- Racial data is self-reported by jurors based on questionnaires distributed at the time they report for service at each court location
- 2001-2010 % of Total Jurors by Race represents cumulative responses for the 10 year period between 2001-2010
- Multi-racial responses are recorded as one (1) full person in each race
- 2000 baseline census numbers for jury demographic study have been filtered to exclude; persons under 18, and Non-U.S. Citizens

- Racial data is self-reported by jurors based on questionnaires distributed at the time they report for service at each court location
- 2011-2015 % of Total Jurors by Race represents cumulative responses for the 4.5 year period between 2011-2015
- Multi-racial responses are recorded as one (1) full person in each race
- 2010 baseline census numbers for jury demographic study have been filtered to exclude; persons under 18, and Non-U.S. Citizens

Summary

Note: These data can provide a good overview of demographic trends for those who report for jury service, but data for individuals who identify as either Hispanic or multi-racial may not be precisely accurate for any of three reasons:

1. Individuals who identify as Hispanic (an ethnicity, but reported here as if it were a racial category) may have selected any one of the racial categories listed on the form, or none of these categories, or “other”
2. Individuals who identified their racial category as “other” are not included in these data
3. Individuals who self-identify as multi-racial can indicate their racial identification by checking “multi-racial”, “other”, two or more of the other racial categories provided on the survey, or check the boxes for any combination of these categories
