Subject: Status of the Stormwater Initiative

City, County Engineers,

Attached is an update on the Stormwater Initiative. As you recall, the Stormwater Initiative was a ballot measure that would provide the opportunity for sustainable funding of flood control and stormwater services. The short story is the ballot measure will not be pursued for this November 2016 election. This temporary setback doesn't mean we're giving up. On the contrary, we all need to continue our efforts to communicate our need for sustainable funding to the public and elected officials in preparation of the next opportunity to place the ballot measure in an election.

Let me know if you have any questions.

Thanks,

Mitch Avalon, Consultant
