APPLICATIONS PERMIT CENTER

Appeal:
The south facing 23' long skylight obstructs about $\frac{1}{3}$ of my Bay View. In
objecting to the height of these skylights. Normal skylights, which will function perfectly
in this application, are 6" above the roof (curb HT). These skylights are drawn to
have an approximate curb of 30", sticking up considerably above the ridge of the
house.

I will submit photos in the near future from my living room to explain my
view loss, as well as other pertinent evidence.

Please email me when the next appeal hearing will be held. I never received
the initial know notice and don't want to miss this.

Thank you,
Allen Trigueiro
