Department of Conservation and Development

County File # WA17-0016

I hereby appeal the approval the above captioned permit to the Board of Supervisors. I reside next to the property at 279 Smith Road which is the location of the proposed cell phone repeater. My neighbors and I object to the locating of an area wide facility in a residential neighborhood. It should be located along Stone Valley Road where other cellular facilities are located. We also object to the conditions of approval recommended, if the site were to be approved. The conditions ignored Ordinance Code section 88-24 408 (f) 2B, which calls for undergrounding of ancillary equipment. The pole, with all its proposed equipment, faces the front of the home at 279 Smith, which is as close as 55 feet away. Putting the equipment in a shroud makes it stand out even more. Painting it brown is not mitigation. I look forward to a hearing before the Board. I would request that you copy all relevant correspondence with those parties who appealed the Zoning Administrator's approval to the Planning Commission.

Regards
