Joseph DeLuca, MA, FACHE

Health Care Expertise | Strategy | Change Management & Technology | Distinguished Speaker & Facilitator | Educator
San Francisco Bay Area

Summary

My journey to improve our health system through executive leadership, informatics and information technology began decades ago in graduate school at the University of Wisconsin-Madison, when I was on a research team that developed predictive severity of illness models for heart attack, burn and trauma patients. These models were used to justify life-flight transportation in several states, improve care standards at rural hospitals as well as trauma centers, and enable skilled non-physician providers to work at the top of their credentials.

My personal flame was lit, and my career today continues this focus on measurably improving the effectiveness, efficiency, quality and safety of health care systems. Today, I design and implement change management initiatives using agile management techniques and performance excellence disciplines, focused on strategic initiatives, complex transitions, service improvement, information technology, informatics, and digital health. I also facilitate decision processes for leadership teams and governance boards. The result: rapid results, sustainable change and a new cycle of confidence.

I also continue to research and write on health care strategy and technology, including corporate sponsored manuscripts such as Technology Powered Healthcare, provide keynote speaking and seminar services, advise companies that share my vision, educate, and serve on nonprofit boards.

Recent interim change management leadership positions I have served include:

- * Community Medical Centers, Fresno, CA--Enterprise Portfolio Management Office
- * 2-1-1 San Diego--Chief Technology Strategist

- * Community Medical Centers, Fresno, CA--Corporate Analytics & Informatics
- * Stanford Children's Health-Lucile Packard Children's Hospital--Enterprise Portfolio Management Office
- * John Muir Health, Walnut Creek, CA--Information Services Planning Office
- * Stanford University Medical Center--Laboratory Informatics Services

Experience

Fulcrum Methods
