|          | Zoom app. Written comments can be submitted in advance of the meeting to           |  |  |  |
|          | Sustainability@dcd.cccounty.us.  |  |  |  |
|          |  |  |  |  |

- 1. Introductions
- 2. Public comment on any item under the jurisdiction of the Committee and not on this agenda (speakers may be limited to three minutes).
- 3. **APPROVE Record of Action from June 28, 2021, Special Meeting of the Sustainability Committee.** (Jody London, Department of Conservation and Development - Sustainability)
- 4. ACCEPT report on Sustainability Funds research findings and CONSIDER staff recommendation for a Sustainability Fund for Contra Costa County that could be used to support investments in County facilities that further the County's environmental sustainability and climate change goals, and REFER the report findings and recommendation for a Sustainability Fund to the full Board of Supervisors for consideration. (Steve Kowalewski, Department of Public Works)

- 5. **RECEIVE UPDATE on Conversion of County Fleet to Electric Vehicles, and PROVIDE DIRECTION.** (Joe Yee, Department of Public Works)
- 6. **RECEIVE REPORT on County Active Transportation Plan and PROVIDE DIRECTION as needed.** (Alexander Zanadian, Department of Public Works)
- 7. **RECEIVE REPORT from Sustainability Commission Chair, or Designee.** (Wes Sullens, Sustainability Commission Chair)
- 8. **RECEIVE REPORT from Sustainability Coordinator.** (Jody London, Department of Conservation and Development Sustainability)
- 9. The next meeting is currently scheduled for September 27, 2021.
- 10. Adjourn

The Sustainability Committee will provide reasonable accommodations for persons with disabilities planning to attend Sustainability Committee meetings. Contact the staff person listed below at least 72 hours before the meeting.

Any disclosable public records related to an open session item on a regular meeting agenda and distributed by the County to a majority of members of the Sustainability Committee less than 96 hours prior to that meeting are available for public inspection at 651 Pine Street, 1st floor, during normal business hours.

Public comment may be submitted via electronic mail on agenda items at least one full work day prior to the published meeting time.

# SUSTAINABILITY COMMITTEE

RECORD OF ACTION FOR June 28, 2021

# Supervisor John Gioia, Chair Supervisor Federal D. Glover, Vice Chair

- Present: John Gioia, Chair Federal D. Glover, Vice Chair
- Staff Present: Will Nelson, Principal Advance Planner; Lashun Cross, Principal Planner; Daniel Barrios, Planner; Dom Pruett, Field Representative for Supervisor Andersen; Erin Steffen, Management Analyst; John Kopchik, Director, Dept of Conservation and Development; Lisa Chow, Field Representative for Supervisor Mitchoff; Luz Gomez, Community Wellness Program Manager; Maureen Toms, Deputy Director, Dept of Conservation and Development; Monica Nino, County Administrator; Susan Psara, Green Business Program Manager
- Attendees: Adrienne Ursino, Aimee Henry, Benisa Bennis, Betty Lobos, Bob Brown, Brandon Matson, Brenna Shafizadeh, Building Power Fellowship, Chuck Leonard, Comeas, Denice Dennis, Fred Glueck, Greenbelt Alliance, Jan Warren, Jenny Balisle, Lisa Zimmer-Chu, Madeline Kronenberg, Martha Goralka, Marti Roach, Mike Moore, Nick Despota, Nik Weinberg-Lynn, Ogie Strogatz, Rachel Shoemake, Shoshana Wechsler, Yete McMahon, 350 Bay Area
- 1. Introductions
- 2. Public comment on any item under the jurisdiction of the Committee and not on this agenda (speakers may be limited to three minutes).
- 3.

APPROVE Record of Action from May 24, 2021, Special Meeting of the Sustainability Committee.

# The Record of Action for the May 24, 2021 meeting was approved.

4. RECEIVE update and PROVIDE DIRECTION on draft environmental justice policy guidance for updated County General Plan.

The Committee received an update from staff on the environmental justice policies for the ongoing update to the County's General Plan. Comments that were received via the Chat function in Zoom as well as comments that were submitted via email are attached.

- 5. The next meeting is currently scheduled for July 26, 1-2:30 p.m.
- 6. Adjourn

#### Contra Costa County Sustainability Committee June 28, 2021 Zoom Meeting Chat

#### From Betty Lobos to All panelists:

... and then how do you define significant impacts. I think it is a great idea to carefully define your terms.

#### From Lisa Zimmer-Chu to All panelists:

Seems to me maybe the key concept in this discussion is around how the COMMUNITY feels about the project, not the size/scale

#### From Lashun Cross to All panelists:

I would like to ask a question around the CBA and Finding (e).

#### From Building Pow... to All panelists and attendees:

Ah yes, the CBA was something was pointed out as something to address as well as the "large scale" piece

#### From Heath... to All panelists:

Thanks for reviewing this plan. I am going to jump off the call as I am planning on attending the presenation tomorrow night that Will was referring to earlier.

# From Building Pow... to All panelists and attendees:

Yes! I appreciate this too! Being able to chat to all and see the real time comments @Will excellent method of transparency and work!

#### From Benisa Berry to All panelists:

Yes, this is great discussion, greatly appreciate this review and transparency. Thank you!

#### From Marti Roach to All panelists:

non polluting migh be more accurate wish we could outright ban drilling for health and for climate drilling for oil and gas

From Building Pow... to All panelists and attendees: OMG! I said the exact same thing! :)

#### From John Gio... to All panelists:

@Building Power Fellowship - good to know others are thinking the same thing

#### From JENNY BALIS... to All panelists and attendees:

SC-A1.8: My name is Jenny Balisle and I've been the Managing Director of the Arts and Culture Commission since last August. Last week, I met with Senior Planner Will Smith and Richmond Museum of History & Culture Executive Director Melinda McCrary in regards to Envision Contra Costa 2040. Ms. McCrary is also a member of the Historical Landmarks Advisory Committee. The Arts Commission will be working on language that incorporates the arts following best practices of Bay Area Counties such as Envision 2040 Alameda. Our new Chair Ben Miyaji has extensive General Plan writing experience.

#### From Shoshana W. to All panelists:

re P3.3—might want to shift emphasis in the sentence so it reads "incorporation of community gardens within new residential development."

#### From JENNY BALIS... to All panelists and attendees:

In addition, I have policy writing experience such as draft language for Richmond's One Percent for Private Development Oridnace. We look forward to incorporating how culture and arts can positively address: Community Health, Environmental Justice, Economic Development, and Sustainability. We'll be working on draft language following the style/template of Envision Contra Costa 2040 to submit to Mr. Smith and the Sustainability Committee. Thank you!

From Marti Roach to All panelists and attendees: +++ arts and culture are important Impacted communities should be prioritized and can include all

From Shoshana W. to All panelists: 3.3 does address address to healthy food, definitely EJ. I just wanted the syntax to emphasis inclusion of a garden element rather than encouragement of residential development address access to healthy food, sorry

#### From Building Pow... to All panelists and attendees:

Yes, there are many pieces also that will fall in the Housing Element and we have vocalized that need as well, glad PlaceWorks has that on their notes. It will be ideal to get a sense of the Housing Element timeline.

#### From Lashun Cross to All panelists:

Why increase to 3,000 rather than 1,500 feet or !,000 feet?

From Shoshana W. to All panelists and attendees: Refineries and other fossil fuel facilities?

From Jody London, County St... to Me: (Privately) Maybe you can take a screen shot? That might be easier.

From Marti Roach to All panelists and attendees: Regarding A6.4, what is the notification for drilling gas and oil (if we are not going to ban it)

#### From Mike Moore to All panelists:

I would support all stationary sources such as refineries, power plants, chemical plants, wastewater treatment plants.

From Building Pow... to All panelists and attendees:

I have to hop off, but I want to share that I appreciated having the red lined comments as well as engaging in conversation with the County and specifically Will Nelson. I do hope that with the other elements, that we can have the same process and redlining from one document proves to be efficient. It would also be helpful to include one working document for community meetings for the following elements vs. 5 facilitators and 5 documents. I appreciate your work on this! I hope to log back on after my meeting! -Dulce Galicia

To: Will Nelson <Will.Nelson@dcd.cccounty.us>
Cc: Federal Glover <Federal.Glover@bos.cccounty.us>
Subject: Written Input to Draft Environmental Justice Policies for updated County General Plan

Dear Mr. Nelson,

Unfortunately, I am not able to attend the Sustainability Committee meeting on June 28. Please include these comments during public input to the Draft Environmental Justice Policies for the updated County General Plan that will be discussed during that meeting.

Page 23: Chapter 9, Health & Safety Element. Policy HS-P2.2 (has to do with opposing the construction of new, large-scale hazardous waste facilities.) My comment: So, what do we do with our hazardous wastes? ... continue to rely on old, small, non-up-to-date facilities? NO! We should build new, large-scale hazardous waste facilities. We should keep them up-to-date. We should NOT, however, build them near sensitive receptors in impacted communities.

Page 18: Chapter 8, Public Facilities & Services Element: Policy PFS-P2.1 (has to do with green space and recreation facilities) My Comment: Please include a modifier of the word 'trails.' It should include paved or unpaved walking trails as well as paved bicycling trails. We should try to connect any new trails that we build in or near impacted communities to existing trails in that area of the County.

Page 12 Chapter 5 Transportation Element: My comment: We need Goals, Policies, and Actions that that REQUIRE the addition of bicycle lanes to arterial and collector streets, especially to routes of regional significance, that run through impacted communities whenever the street undergoes any street maintenance or rehabilitation that includes the repainting of lane striping on the street when the affected street is longer than one block or longer than 1/4 mile. The new bike lanes must be on both sides of the street and must extend all the way to the limit line at any intersections. Note: This may result in a reduction in size of vehicle traffic lanes or the actual elimination of an occasional traffic lane. Suburbs, well-to-do and otherwise, have bicycle lanes. There is no reason that impacted communities should not.

Page 21. Health & Safety Element: Policy HS P1.5. My comment: We should require a 'reasonable' amount of safe, secure, and convenient bicycle parking with outlets for electric bicycle charging stations at new or expanded big box stores, etc. that are built anywhere in the County. We should also require that any new construction or expansion as listed in this policy that has to build new or adjust the curb and gutter along the edge of said project abutting a public street (arterial or collector) install a bike lane.

Page 22. Health & Safety Element: Policy HS P1.10. My comment: We should add a Policy P 1.10.5: It should require that any new residential development that has to construct new or merely adjust the curb and gutter along any public street (arterial or collector) adjacent to said project include a bicycle lane.

Thank you for accepting these comments, reading them aloud during the proper time of the meeting, and including them in the appropriate portion of the Sustainability Committee's input to the County's General Plan update.

All best wishes,

~0le

# Subcommittee Report

## SUSTAINABILITY COMMITTEE

| <b>Meeting Date:</b>  | <b>Date:</b> 07/26/2021   |  |  |
|-----------------------|---|--|--|
| <u>Subject:</u>       | RECEIVE UPDATE on County Sustainability Fund, and PROVIDE DIRECTION.      |  |  |
| <b>Submitted For:</b> | Jody London, Sustainability Coordinator                                   |  |  |
| <b>Department:</b>    | Conservation & Development  |  |  |
| <b>Referral No.:</b>  |   |  |  |
| <u>Referral Name:</u> | RECEIVE UPDATE on County Sustainability Fund, and PROVIDE DIRECTION.      |  |  |
| Presenter:            | Steve Kowalewski, Department of Public Contact: Jody London (925)655-2815 |  |  |

## **Referral History:**

On September 20, 2020, the Board of Supervisors adopted a Climate Emergency Resolution (Resolution). Among other things, the Resolution directed the establishment of "an interdepartmental task force of all Department heads, or their senior deputies, that will focus on urgently implementing the County's Climate Action Plan..., and identifying additional actions, policies, and programs the County can undertake to reduce and adapt to impacts of a changing climate."

The Interdepartmental Climate Action Task Force brought its first report to the Board of Supervisors on March 30, 2021. One of the recommendations in the first report was to establish a Sustainability Fund.

## **Referral Update:**

The Contra Costa County Board of Supervisors directed staff in March 2021 to develop recommendations for a Sustainability Fund that could be used to support investments in County facilities that further the County's environmental sustainability and climate change goals.

# Recommendation(s)/Next Step(s):

Accept report on Sustainability Fund research findings and consider staff recommendation for a Sustainability Fund for Contra Costa County that would be used to support investments in County facilities that further the County's environmental sustainability and climate change goals. Refer the report findings and recommendation for a Sustainability Fund to the full Board of Supervisors for consideration.

Staff recommends that a Sustainability Fund be established with an annual allocation of \$1-\$5 million for the next 5 years. Public Works staff will report back to the Sustainability Committee

annually on progress on project implementation and progress towards improving the data quality and performance metrics through improved tracking systems. At the end of 5 years, the Public Works Department will report back to the Sustainability Committee with a recommendation to evolve the Sustainability Fund to a revolving fund based on whether Public Works is able to develop the data and metrics needed to track actual cost savings for sustainability projects.

Staff recommends the Department of Public Works have primary responsibility for the Sustainability Fund, working in consultation with an interdepartmental advisory committee and the County Administrator's Office. Public Works would identify projects, oversee projects to completion, track savings (estimated or actual), and report annually on the fund's impact. This conforms to best practices learned from other jurisdictions.

In our research, an interdepartmental committee was identified as a key element for a Sustainability Fund. The recently created Interdepartmental Climate Action Task Force could play this role. The Task Force consists of department heads or designated representatives of each County department. It would convene throughout the year to make ongoing recommendations about the Sustainability Fund's management including the process of identification and selection of the projects the County should implement.

#### Fiscal Impact (if any):

Staff recommends an investment of \$1-\$5 million from the General Fund annually for 5 years. The Committee and the full Board of Supervisors could also consider using one or a combination of General Fund funding, American Recovery Act funding, or if the federal infrastructure bill passes, there may be additional funds that can be directed towards sustainability projects. Investment will be used for projects that benefit the environment and/or reduce operating costs.

At the end of 5 years, the Sustainability Fund may evolve into a revolving fund that is replenished with cost savings from reduced energy usage and reduced fuel and vehicle maintenance costs. If, at the end of 5 years, the Board of Supervisors determined that the revolving fund model will work, the annual investments may be decreased or eliminated depending on the cost savings realized.

# **Executive Summary**

The Contra Costa County Board of Supervisors directed staff in March 2021 to develop recommendations for a Sustainability Fund that could be used to support investments in County facilities that further the County's environmental sustainability and climate change goals. Staff from the Department of Conservation and Development consulted with several cities and counties, both within California and nationally, to identify best practices and lessons learned.<sup>1</sup> This report presents those best practices, implementation challenges, and recommends how Contra Costa County could structure a Sustainability Fund.

#### **Best Practices**

In structuring a Sustainability Fund, it is important to be clear about:

- <u>Measuring savings</u>. There is a tradeoff between level of accuracy and resources required. The County should be clear about how it will measure energy and budget savings.
- <u>Performance metrics</u>. It is important to consider both financial (payback period, rate of return, net present value, return on investment) and environmental (energy savings, greenhouse gas reductions) metrics and to be clear about which will be used for a County Sustainability Fund.
- <u>Fund oversight</u>. Most jurisdictions have an interdepartmental committee that evaluates and makes recommendations on where sustainability funds will be used.
- <u>Fund growth</u>. It is important to think about how the fund will grow, whether savings will be reinvested in the fund wholly or in part, and whether departments will share in any savings.
- <u>Accounting system</u>. It's important to know how funds will be tracked.

#### Recommendations

Staff recommends that a Sustainability Fund be established with an annual allocation of \$1-\$5 million for the next 5 years. Public Works staff will report back to the Sustainability Committee annually on progress on project implementation and progress towards improving the data quality and performance metrics through improved tracking systems. At the end of 5 years, the Public Works Department will report back to the Sustainability Committee with a recommendation to evolve the Sustainability Fund to a revolving fund based on whether Public Works was able to develop the data and metrics needed to track actual cost savings for sustainability projects.

Staff recommends the Department of Public Works have primary responsibility for the Sustainability Fund, working in consultation with an interdepartmental advisory committee and the County Administrator's Office. Public Works would identify projects, oversee projects to

<sup>&</sup>lt;sup>1</sup> Staff interviewed the following jurisdictions to put this report together: County of San Luis Obispo (CA), County of Sonoma (CA), County of Santa Clara (CA), County of San Mateo (CA), County of Alameda (CA), City of Santa Barbara (CA), and City of Boston (MA). Additionally, staff consulted in writing with members of the Urban Sustainability Directors Network.

completion, track savings (estimated or actual), and report annually on the fund's impact. This conforms to best practices learned from other jurisdictions.

In our research, an interdepartmental committee was identified as a key element for a Sustainability Fund. The recently created Interdepartmental Climate Action Task Force could play this role. The Task Force consists of department heads or designated representatives of each County department. It would convene throughout the year to make ongoing recommendations about the Sustainability Fund's management including the process of identification and selection of the projects the County should implement.

## Introduction

In September 2020, the Contra Costa County Board of Supervisors created an Interdepartmental Climate Action Task Force ("Task Force") to focus on "urgently implementing the County's Climate Action Plan."<sup>2</sup> The Task Force's first two meetings included discussion around sustainability opportunities within County operations. Several Task Force members suggested establishing a Sustainability Fund to support these opportunities. This suggestion was included in the Task Force's first report to the Board of Supervisors on March 30, 2021 to "Establish a Sustainability Fund that is supported by an annual investment and/or is structured as a revolving fund." At the March 30th meeting, the Board directed staff to provide more information about Sustainability Fund mechanisms other jurisdictions have implemented.

Sustainability Funds are highly customizable. In conducting this research, it became apparent that existing fund structures have been built upon elements that best support the needs of particular jurisdictions. As Contra Costa County considers establishing a Sustainability Fund, decisions and trade-offs will have to be made regarding metrics, administrative processes, and fund mechanics. This report distills a series of best practices based on multiple jurisdictions' lessons learned to inform the County's Sustainability Fund process.<sup>3</sup>

# Sustainability Fund Research Background

To prepare this report, County Department of Conservation and Development staff interviewed multiple jurisdictions about their Sustainability Funds and conducted additional online research on several additional jurisdictions' Sustainability Funds. A database of findings

<sup>&</sup>lt;sup>2</sup> Contra Costa County Board of Supervisors, Resolution No. 2020/256, Endorsing the Declaration of a Climate Emergency in Contra Costa County That Demands Accelerated Actions on the Climate Crisis and Calls on Local and Regional Partners to Join Together to Address Climate Change.

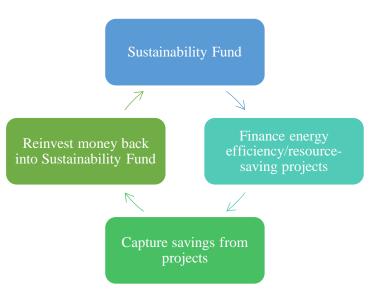

<sup>&</sup>lt;sup>3</sup> Staff interviewed the following jurisdictions to put this report together: County of San Luis Obispo (CA), County of Sonoma (CA), County of Santa Clara (CA), County of San Mateo (CA), County of Alameda (CA), City of Santa Barbara (CA), and City of Boston (MA). Additionally, staff consulted in writing with members of the Urban Sustainability Directors Network.

can be found in the attached document<sup>4</sup>. Below is a summary of common themes and best practices for the County to consider when developing, implementing, and operating its own Sustainability Fund.

# Sustainability Fund Timeline

Based on interviews with jurisdictions and review of guides outlining the process of launching a Sustainability Fund, this is the general process other local governments have taken to start their Sustainability Funds:

- Conduct research on similar funds run by similar organizations.
- Determine structure of fund and gather feedback from relevant stakeholders.
- Create an interdepartmental decision-making committee and set up internal accounting and administrative processes to support the fund.
- Conduct energy audits of all jurisdiction-owned properties to develop a pipeline of projects and establish baseline energy use data.
- Prioritize certain buildings/projects starting with low-hanging fruit (projects with short payback periods, low cost of implementation, and high potential for savings).
- Execute projects, measure utility use reductions, and put the realized savings back into the Sustainability Fund for the next cycle of projects.

#### **Revolving Loan Basic Structure**

<sup>&</sup>lt;sup>4</sup> Much of the information provided in the attached document comes from the County of San Luis Obispo's Energy and Water Coordinator research to inform their own sustainability revolving fund known as the Revolving Energy and Innovation Fund (REIF).

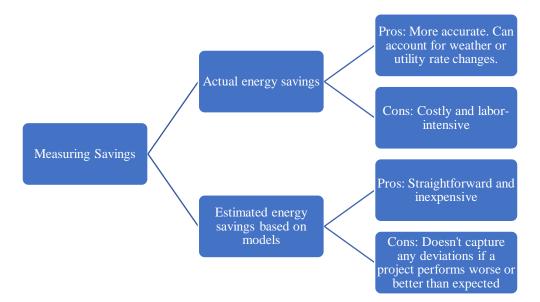

# **Best Practices**

Based on our research, a number of best practices contradict one another because each methodology was customized to best suit a specific jurisdiction's goals. These best practices are captured below, categorized by element to illustrate the trade-offs that are associated with each option.

#### A. Measuring Savings

There is a spectrum of options regarding measuring savings that jurisdictions use. On one side of the spectrum, jurisdictions track actual energy savings which requires a significant amount of staff time. This method has been prohibitive for many jurisdictions that have implemented a Sustainability Fund specifically because of the staffing requirements. The other side of the spectrum uses energy savings models to estimate impacts which requires less staff time.

Several options fall in the middle of the spectrum as a hybrid of actual and estimated energy savings. One option assesses whether utility costs are decreasing over time. This option wouldn't affect project repayments, but could help verify that projects are generally decreasing costs. Another option bases the loan approval and repayment schedule on estimated savings and then tracks actual energy savings to verify that the project is functioning as predicted. Yet another option performs upfront and retroactive measurement and verification on larger projects and uses project specifications and engineering estimates on smaller projects.

#### **B.** Performance Metrics

There are several common performance metrics that jurisdictions use to determine which projects to pursue: payback periods, return on investment (ROI), net present value (NPV), internal rate of return (IRR), resource savings, and/or greenhouse gas (GHG) reductions. Some

jurisdictions choose to focus on a combination of payback period, ROI, and IRR. However, depending on the goals of the specific jurisdiction's Sustainability Fund, the relative emphasis on each of these metrics shifts.

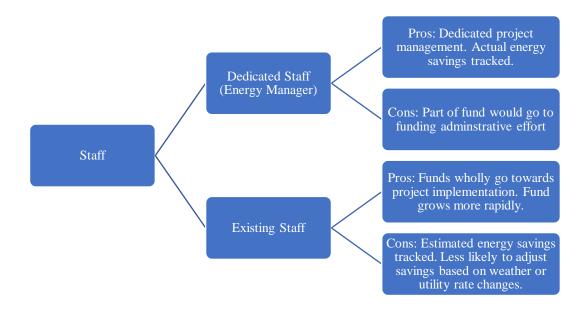

These performance metrics are all useful to contextualize the lifecycle costs of the projects County departments could undertake. Since the payback period of most projects would span several years, this multi-year time frame should be accounted for when selecting projects to prioritize and execute rather than choosing projects solely based on initial costs.

| Metric Type                | Definition   | Pros   | Cons  |  |
|----------------------------|--|--|---|--|
|                            | Financial Performance Metrics  |  |   |  |
| Payback Period             | The amount of time<br>required for a project to<br>recoup its original<br>capital and installation<br>cost with the savings it<br>generates.                       | Simple and common<br>metric to easily<br>compare the<br>financial viability of<br>different projects.  | Does not account<br>for the cost of<br>capital and cannot<br>be directly<br>compared to metrics<br>that track<br>investment<br>performance on an<br>annual or monthly<br>basis. Does not<br>capture the total<br>volume of savings<br>achieved. |  |
| Return on Investment       | Savings a project<br>generates as a<br>percentage of its<br>upfront cost. Can be<br>calculated for the entire<br>lifetime of the project<br>or on an annual basis. | Assesses the savings<br>from a project<br>relative to its cost.  | Does not capture the<br>total volume of<br>savings.   |  |
| Internal Rate of<br>Return | Represents the<br>profitability of a project<br>in the presence of<br>discounting. Often used<br>to compare prospective<br>investments.                            | Incorporates<br>information missed<br>by other metrics<br>including the time-<br>value of money and<br>information about<br>when costs and<br>savings actually | Does not capture<br>total volume of<br>savings achieved.<br>Unintuitive for non-<br>technical audiences.  |  |

| Metric Type                        | Definition  | Pros   | Cons   |
|------------------------------------|---|--|--|
|                                    |   | occur in the project's lifetime.   |  |
| Net Present Value                  | Total net savings of a<br>project and accounts<br>for the time-value of<br>money. Discounts costs<br>and savings depending<br>on how far into the<br>future they occur. | Considers the total<br>number of years the<br>project will be<br>active. Captures<br>relevant factors such<br>as project lifetime,<br>the time-value of<br>money, and total<br>volume of net<br>savings that are<br>omitted by other<br>metrics. | Unintuitive for non-<br>technical audiences<br>and relies on often<br>arbitrary discount<br>rates. |
|                                    | Environmental Perfo   | ormance Metrics  |  |
| Resource Savings                   | Total amount of<br>electricity, fuel, water,<br>waste, or other<br>materials that are<br>conserved or produced<br>by the project.                                       | Straightforward<br>metric  | Difficult to compare<br>different project<br>types.  |
| Greenhouse gas<br>(GHG) Reductions | Project's reduction of<br>greenhouse gas<br>emissions.  | Accounts for the<br>amount of resources<br>saved, the GHG<br>emissions intensity<br>of those resources,<br>and the global<br>warming potential<br>of GHGs.   | Can be difficult for<br>groups to<br>conceptualize the<br>scale of reductions.                     |

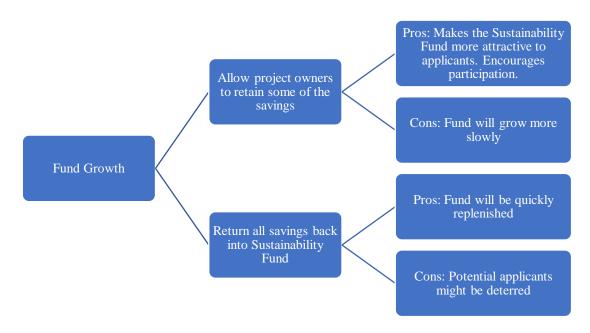

# C. Fund Oversight

The majority of jurisdictions surveyed have an interdepartmental committee that provides oversight and guidance to the fund ranging from defining project criteria to verifying annual project energy savings. Common committee membership includes facility operation managers and managers from finance and sustainability departments. This provides jurisdictions crossdepartmental buy-in and ensures that all relevant stakeholders are involved in the Sustainability Fund's operation. Fund management varies across jurisdiction depending on staffing capacity and funding. Some jurisdictions have a dedicated energy manager tasked with day-to-day fund operation, dedicated project management, and tracking actual energy savings. The position could be paid for by tacking on an administrative fee of around 2% as part of the loan terms. A 2% fee was identified as the ideal surcharge as it ensures there is enough funding for administrative personnel without deterring project applications. However, several resource-constrained jurisdictions noted that having existing staff administer the fund is also a viable option as long as savings are based on modeled estimates rather than actual savings.

#### D. Fund Growth

There is a tradeoff between making the Sustainability Fund financially attractive to applicants and growing the fund over time. If the jurisdiction's goal was to grow its fund as fast as possible, it would create 0% interest loans and target all of the low-hanging fruit projects in their jurisdiction. If it needed to incentivize departments to take advantage of the loans, the jurisdiction would allow project owners to collect project savings for three years and afterwards redirect the savings back to the Sustainability Fund.

#### E. Accounting System

There are two main accounting systems that Sustainability Funds use depending primarily on whether or not the County department has control over its budget.

|          | Loan Model  | Accounting Model   |
|----------|---|--|
| Overview | County department borrows money<br>from the fund via a budget transfer.<br>The department is responsible for<br>repaying the loan using project<br>savings.                                 | Funds are transferred to County<br>department or facilities department.<br>Repayment is made via a transfer of<br>funds back into the Sustainability Fund<br>from a centrally managed operating<br>budget. |
| Best Fit | County departments have control over<br>distinct operating budgets, discrete<br>ownership of projects, and facilities<br>staff or building technicians to assess<br>potential improvements. | County department does not have<br>discrete ownership of project and/or<br>draws from the same pool of money for<br>building-related expenses as the<br>Sustainability Fund (ex: A General<br>Fund).       |

Some best practices that have worked for jurisdictions across the board include:

• Making the Sustainability Fund its own budget item to create a dedicated sustainabilityoriented pool rather than risk losing dedicated funding if the Fund was part of the General Fund,

- Creating buy-in and ensuring the longevity of the program within the organization using the business case for the fund,
- Selecting projects based on two main factors: alignment with the fund's mission and compatibility with the actual portfolio of projects that are available for investment, and
- Prioritizing projects in a way that best allocates limited resources while accounting for the feasibility and timing of projects given other constraints.

| Obstacle   | Solution   |
|--|--|
| Staff not encouraged to<br>improve building efficiency<br>because, if they cut costs, their<br>operating budget will be reduced<br>accordingly the next fiscal year. | <ul> <li>Freeze utilities or operating budgets during the repayment period of the project to ensure facility managers see the benefit of achieving savings through efficiency projects.</li> <li>Facilitate the careful tracking and management of savings resulting from projects, so stakeholders can negotiate when and by how much operating budgets will be cut in response to those savings.</li> <li>Require only a certain portion of savings to be repaid into the fund, allowing the project funder to immediately receive some of the financial benefit even while the full project cost is more slowly being repaid. A revolving fund helps to restore the incentive to conserve by formalizing project savings and revolving them back into the fund, which can then be tapped by the same stakeholders for future projects.</li> </ul> |
| Paying for staff time and management   | <ul> <li>Ensure loan repayment terms capture enough revenue<br/>each year to sustainably administer the fund. For<br/>example, a 2% interest for administrative costs ensures<br/>there is enough funding for administrative personnel<br/>without deterring project applications</li> <li>Include a fee that would be bundled into the<br/>repayment terms (i.e., asking loan recipients to pay<br/>back more than 100 percent of the loan value from<br/>generated savings, such as through an additional<br/>payment at the end of the repayment term).</li> </ul>  |
| Concerns about accurately measuring savings  | • Conduct an upfront audit or engineering assessment to forecast savings potential over the project's lifetime,  |

# Common Obstacles and Recommended Solutions

| Obstacle  | Solution  |  |
|---|---|--|
|   | demonstrating the short- and long-term value of the loan to the recipient.  |  |
|   | • Conduct the measurement and verification of project savings using an agreed upon process, providing data which verifies that the level of achieved savings is consistent with repayment terms. Then, create a repayment structure that adjusts to changes in savings beyond the original estimates. |  |
|   | • Consult resources to confirm the typical savings generated by similar projects at other institutions, increasing buy-in by demonstrating past success.  |  |
| Concern about exhausting high-<br>payback low-hanging fruit<br>projects | <ul> <li>Learn from the experiences of jurisdictions' already established fund structures.</li> <li>Bundle projects of various payback lengths.</li> <li>Examine the value of higher-hanging fruit such as deep retrofits and renewable energy installations.</li> </ul>                              |  |

# Sustainability Fund Operation in Contra Costa County

Why a Sustainability Fund? As mentioned at the beginning of this report, the Interdepartmental Climate Action Task Force discussed implementation challenges and recommended a Sustainability Fund be set up to help implement sustainability projects and programs. The Task Force identified project implementation funding as the top implementation challenge.

Why do we need a Sustainability Fund if we are currently implementing sustainability projects such as solar, Electric Vehicles (EV), Electric Vehicle chargers, and Light Emitting Diodes (LED) retrofits? It is true that the County has implemented many sustainability projects without the use of a Sustainability Fund. However, the County financed the projects through a variety of methods that did not require a local match investment. For example, PG&E's on-bill financing was a tool used to fund the capital improvements without having to front the funding. Unfortunately, some of these tools, such as the on-bill financing, are no longer allowed to be used. We have also used Power Purchase Agreements and third-party energy reduction firms that evaluated, designed, and constructed energy reduction projects in exchange for a portion of the cost saving due to the project. These delivery tools also come with issues and constraints.

In order to move the County forward towards implementing sustainability projects and avoid some of the challenges and constraints with using various tools to finance the projects, the

Board of Supervisors requested that staff investigate the use of a Sustainability Fund or Revolving Fund as recommended by the Inter-departmental Climate Action Task Force Committee. The research conducted by Conservation and Development identifies pros and cons to various Sustainability Funds used by other agencies. The information is useful to identify lessons learned and best practices in trying to develop a Sustainability Fund structure that meets Contra Costa's complex infrastructure financing system.

In developing a recommendation on a Sustainability Fund for Contra Costa, staff first identified an "ideal" structure for funding sustainability improvements. Based on the ideal situation, staff evaluated the challenges associated with creating this structure, and has developed the recommendation below for a structure that addresses the implementation challenges.

|    | Ideal Sustainability Fund Structure<br>(Revolving Fund)   | County Implementation Challenges  |
|----|---|---|
| 1. | One-time investment of unconstrained<br>funding (ok to use on General Fund and<br>non-General Fund funded County<br>buildings)  | A defined source of funding has not been<br>identified. The funding should be<br>unconstrained to be able to improve the<br>highest impact projects and not just focused<br>on General Fund funded building, such as is<br>done with Facilities Lifecycle Improvement<br>Program (FLIP) projects. |
| 2. | Sustainability Fund managed by Public<br>Works with direction from CAO and<br>Board of Supervisors  | Fund does not currently exist. Fund oversight<br>expectations and project approval process<br>need to be developed.   |
| 3. | Project identification and prioritization<br>based on various Board adopted<br>documents (Distributed Energy<br>Resources (DER), Climate Action Plan<br>(CAP), Energy Reduction Plan (ERP),<br>Building Codes, Administrative<br>Bulletins) | Although Public Works has used industry<br>accepted selection criteria, such as energy<br>use, occupancy frequency, etc. to identify a<br>preliminary list of projects, these have not<br>been reviewed and approved by the CAO.  |
| 4. | Agreed-upon project selection criteria<br>used to prioritize improvements   | Project selection criteria and prioritization<br>needs to be finalized. Ideal selection and<br>prioritization criteria may be difficult to apply<br>due to limitations in our existing tracking<br>systems. Ideal metrics are not easily<br>available to base selection decisions.                |

The following table describes an ideal Sustainability Fund/Revolving Fund structure and challenges related to implementation to fit the County financing and project delivery structure.

|    | Ideal Sustainability Fund Structure<br>(Revolving Fund)                                    | County Implementation Challenges   |
|----|--|--|
| 5. | Project approval by a Project Review<br>Committee (CAO, Public Works, Task<br>Force, etc.) | The Board directed that the Inter-<br>departmental Climate Action Task Force be<br>formed to address sustainability issues. Need<br>to determine if this Committee is the<br>appropriate make-up to evaluate projects. The<br>Committee may be more suitable to review<br>overall process challenges rather than review<br>the merits of individual sustainability<br>projects.  |
| 6. | Commit funding towards approved projects   | Need to agree how funding is committed to a<br>prioritized project. Will the CAO approve or<br>will Board action be necessary? Will the<br>Sustainability Fund be a separate line item of<br>the General Fund and subject to annual<br>allocation decisions? This could make it<br>difficult to plan larger multi-year projects.   |
| 7. | Pre-project evaluation (data/metrics)  | Public Works currently does not have the<br>resources to conduct a pre-project evaluation<br>of many sustainability projects, such as<br>energy reduction or solar installations. This<br>effort would need better utility tracking<br>software and possibly the installation of sub-<br>meters to collect the appropriate data/metrics<br>to evaluate project impact. This effort would<br>also require additional staff time to conduct<br>the evaluations and analyze the data/metrics.                   |
| 8. | Design and Construct Sustainability<br>Project   | Public Works is able to successfully deliver<br>sustainability projects. The Department has<br>partnered with the CAO's Office and County<br>Departments to deliver many solar<br>installations, energy reduction projects, water<br>reduction projects, and new LEED certified<br>buildings. The challenge of implementing<br>sustainability projects is not with staff's<br>ability to deliver projects, but rather with the<br>lack of dedicated funding and clear authority<br>on project authorization. |
| 9. | Post-project evaluation (data/metrics)   | Same issues as described above under pre-<br>project evaluation.   |

| Ideal Sustainability Fund Structure<br>(Revolving Fund)  | County Implementation Challenges   |
|--|--|
| <ul> <li>10. Identify "Actual Cost Savings" from<br/>project implementation. Staff support and<br/>data extraction tools are funded and<br/>available. Cost savings are purely based<br/>on constructed improvements and other<br/>variables, such as weather, occupancy,<br/>etc., did not impact cost savings<br/>calculation. Improvement can be<br/>monetized.</li> </ul>  | Actual cost savings are typically dependent on<br>a number of variables that may skew benefits<br>realized from a sustainability project.<br>Calculating actual cost savings requires a<br>significant amount of staff and other resources<br>to be useful. Some sustainability improvement<br>benefits cannot be monetized (clean water bio-<br>swales). Without accurate cost savings<br>information, difficult to create a revolving that<br>is supported by data/metrics.  |
| 11. Annual cost savings are used to replenish<br>the Sustainability Fund (making it a<br>revolving fund). To add incentive to<br>Departments, cost savings can be shared<br>with the Department so they receive an<br>immediate benefit from implementing<br>project. Cost savings are deposited into<br>the Sustainability Fund until the capital<br>investment is repaid including an<br>additional amount to cover administrative<br>costs for the program (finance staff,<br>software tools, reporting requirements,<br>etc.). There are no constraints from<br>Department specific funding that would<br>prohibit the replenishment of cost savings<br>into the Sustainability Fund to be used by<br>all departments. | Some County Departments are funded with<br>State and/or Federal funding that gets audited<br>routinely. There may be an issue if the<br>Department's utility costs go down, yet they<br>are paying a higher amount to fund the<br>Sustainability Fund until the revolving fund is<br>repaid. Departments funded with restricted<br>funds may have an issue of paying for pro-<br>active sustainability improvements that are<br>not "required" with any building upgrades or<br>improvements. A revolving fund is a type of<br>"loan" or debt financing. Some fund sources<br>may require a voter approval for debt<br>financing. Would this debt financing count<br>against the County's cap, or since it is<br>internal, would it not count against the cap?<br>As mentioned above, if we are unable to<br>monetize project impacts, then the desire for<br>the Sustainability Fund to be a revolving fund<br>will be challenging to maintain. |
| 12. Implement next project or bundle of<br>projects using replenished Sustainability<br>Fund.  | No issue   |

As shown in the table above, staff identified many "challenges" that need to be further developed to reach an "ideal" Sustainability Fund structure. However, with the Board of Supervisors declaring a Climate Emergency, staff is recommending a modified structure to begin implementing sustainability projects immediately. Staff recommends the following modified financing and process structure to begin implementing sustainability projects for County Departments.

- Staff recommends the Board of Supervisors establish a Sustainability Fund with the mission to fund sustainability projects that benefit the environment and fulfills the mission of the Climate Action Plan for all County building infrastructure. The use of the funding would not be restricted to General Fund funded infrastructure, but could also be used by Departments that are funded with restricted funding. This condition allows staff to focus on the highest impact projects without being constrained to General Fund funded buildings as is the case with Facility Lifecycle Improvement Projects (FLIP program). Having unrestricted funds allows staff to better bundle projects and coordinate improvements across all County infrastructure.
- Staff recommends the Board of Supervisors allocate \$1-\$5 million annually to the Sustainability Fund for the next 5 years. A portion of the allocation each year would be used to improve the Public Works Department's ability to track utility costs, energy usage, and greenhouse gas reduction with the majority of the annual allocation going to project implementation. At the end of 5 years, the Public Works Department will report back to the Sustainability Committee on the progress made on tracking utility costs, energy usage, and greenhouse gas reduction. Based on the results and the ability to track "actual" cost savings, Public Works will make a recommendation to convert the Sustainability Fund to a Revolving Fund that will be funded with actual cost savings by the various Departments or to continue with the original Sustainability Fund structure where annual allocations are made to the fund from the General Fund or other appropriate fund source. If the County prefers to pursue a revolving fund, another option is to fund the Sustainability Fund with "estimated" cost savings rather than "actual" cost savings would be used for Departments to deposit back into the revolving fund.
- Because the Public Works Department is primarily responsible for facilities management, it would be most effective for the Sustainability Fund to be managed by the Public Works Department. Public Works would identify projects, oversee projects to completion, track savings (actual or estimated), and report annually on the fund's impact. This is in line with the research for this report, in which seven out of the thirty jurisdictions researched had their Public Works department or equivalent alone in charge of the fund's management.
- Across the board, the most common element between jurisdictions' Sustainability Funds was an interdepartmental committee. Twenty-one out of the thirty jurisdictions identified an interdepartmental committee as a key element in their Sustainability Fund office. Because the Interdepartmental Climate Action Task Force was created to implement actions identified in the Climate Action Plan, the group is well positioned to act as the interdepartmental advisory committee to the Sustainability Fund. This committee, consisting of department heads or designated representatives of each County department, would convene to make ongoing

recommendations about the Sustainability Fund's management, including the procedure of identifying and selecting projects the County would implement.

- The County's Energy Manager (Public Works staff) would work with the Facilities, Capital Project Management, and Fleet Divisions within Public Works to identify sustainability projects using technical and practical knowledge of the County's building infrastructure and fleet operations. Project selection would be based on County adopted documents and bulletins, such as the Distributed Energy Plan, Climate Action Plan, Energy Reduction Plan, Administrative Bulletins, and building codes. The projects would be prioritized and submitted to the County Administrator's Office for approval of the projects and authorizing the use of funding from the Sustainability Fund prior beginning work on any project.
- The Energy Manager and staff from Facilities Services, Capital Projects, and Fleet Services have identified several projects that could be implemented immediately if the Board of Supervisors approves the Sustainability Fund concept and allocates funding. Depending on the amount of funding allocated, Public Works would submit the initial list of projects to the CAO for approval to implement. The initial focus of the Sustainability Fund would be on energy reduction projects, installation of electric vehicle charging stations, and electrification of the County's fleet vehicles.
- Public Works will provide annual reports to the Sustainability Committee on progress toward project implementation funded by the Sustainability Fund.

## Contra Costa County Board of Supervisors

## Subcommittee Report

| SUSTAINABIL           | ITY COMMITTEE   |
|-----------------------|---|
| <b>Meeting Date:</b>  | 07/26/2021  |
| <u>Subject:</u>       | RECEIVE UPDATE on Conversion of County Fleet to Electric Vehicles, and PROVIDE DIRECTION. |
| <b>Department:</b>    | Public Works  |
| <b>Referral No.:</b>  |   |
| <b>Referral Name:</b> | RECEIVE UPDATE on Conversion of County Fleet to Electric Vehicles, and PROVIDE DIRECTION. |
| Presenter:            | Joe Yee, Department of Public <u>Contact:</u> Jody London (925)655-2815<br>Works          |

### **Referral History:**

The Sustainability Committee has received reports from the Department of Public Works at meetings on November 5, 2018, January 28, 2019, August 1, 2019, December 9, 2019, and May 24, 2021. At the May 24, 2021, meeting, the Sustainability Committee requested that Public Works come back to the Committee at its next regular meeting in July with an updated report of EV charging station needs at County facilities and a cost analysis of installing EV chargers at those facilities.

The Committee asked Public Works to create a summary of the total number of hybrid, electric, and internal combustion engine vehicles purchased by each County department over the last two years; an inventory of all the charging stations that exist at County facilities including their type and who can access them; an updated list of which County facilities will need more chargers to successfully electrify the County's fleet, where the infrastructure would go, and how much it would cost; a status update on the sustainability fund which could potentially fund this work; and an assessment of existing County policies around EV chargers and fleet electrification.

The Board of Supervisors also receives annual reports on the status of the disposition of the County's fleet through the Internal Operations Committee of the Board.

#### **Referral Update:**

The attached report responds to the information requested by the Sustainability Committee at its May 24, 2021 meeting.

### **Recommendation(s)/Next Step(s):**

**RECEIVE UPDATE** on Conversion of County Fleet to Electric Vehicles, and **PROVIDE DIRECTION.** 

### Fiscal Impact (if any):

As of January 2021, a preliminary estimate for installing 92 potential charging stations at County facilities was \$2.3 million. Electric vehicles cost the same or less to purchase, and have lower lifetime costs due to fewer operations and maintenance requirements and lower fuel costs.

Updated Report on EV Implementation in County Fleet

Contra Costa County Public Works Department

### Memo

July 26, 2021

| Sustainability Committee                            |
|---|
| Supervisor John Gioia, District I – Chair           |
| Supervisor Federal Glover, District II              |
| Brian M. Balbas, Public Works Director              |
| Updated Report on EV Implementation in County Fleet |
|   |

At the May 24, 2021 Sustainability Committee meeting, staff was directed to provide:

- 1. A summary of the total number of hybrid, electric, and internal combustion engine vehicles purchased by each department over the last two years.
- 2. An inventory of all the charging stations that exist at County facilities and who can access them.
- 3. An updated list of which County facilities will need more chargers and the cost.
- 4. An assessment of existing County policies EV chargers and fleet electrification.

Between 2018 – 2020, 347 vehicles were purchased. Attachment A summarizes the vehicles purchased broken out by department, type of vehicle (pickup, sedan, SUV, truck, van) and fuel used (battery electric (BEV), diesel, hybrid, plugin hybrid electric (PHEV), and unleaded).

The spreadsheet in Attachment B shows the location of existing EV chargers in addition to proposed County facilities recommended for EV chargers based on whether the facility has existing or proposed solar PV system and the number of County vehicles assigned at the location.

Finally, Attachment C contains proposed revisions to Administrative Bulletin 507.9 and 508.5 to strengthen the requirement to replace internal combustion engine vehicles with BEV.

Draft Revisions to Administrative Bulletin 507.9 & 508.5

#### CONTRA COSTA COUNTY Office of the County Administrator

ADMINISTRATIVE BULLETIN

Number: 507,10 Date: June 2,2021, Section: Property & Equipment SUBJECT: County Vehicle Operation

The County owns, leases, rents, and maintains vehicles for use by authorized persons in the conduct of official County business. This Administrative Bulletin establishes policy and procedures for the use and operation of County vehicles, including the investigation and evaluation of vehicle accidents. For purposes of this Administrative Bulletin, any vehicle the County owns, leases, or rents is a "County vehicle."

POLICY

Each department head is responsible for:

Requiring safe and economical operation of County vehicles.

Authorizing individuals to operate County vehicles on County business.

Informing individuals of the provisions of this and other appropriate Administrative Bulletins and relevant department policies, if any.

#### PROCEDURES

I. ADMINISTRATION. Each department is responsible for implementing the following procedures:

- A. The department head may authorize a County employee, contract worker, or volunteer (collectively, "driver(s)") to operate a County vehicle or may authorize the rental of a vehicle for County work-related purposes through Public Works Fleet Services ("Fleet Services") or Public Works Purchasing Division ("Purchasing"). Departments must ensure that the following conditions are met:
  - Any driver operating County vehicles and/or equipment must hold a current, valid, and appropriate DMV operator's license(s) for each vehicle or piece of equipment that they are assigned to use and operate (e.g., Class A, B, C, and special endorsements). Operation of County vehicles and/or equipment with a suspended or inadequate operator's license is expressly prohibited.
  - 2. Maintain and keep current a list of the department's authorized drivers. Appendix A is an example form.
  - 3. Maintain a photocopy of each authorized driver's valid license on file in the Department.
  - 4. Ensure the authorized driver has received instructions on vehicle operation, including vehicle inspection checklists, maintenance responsibilities, applicable emergency forms, and department and County notification procedures/requirements.
  - 5. \_\_Instruct the authorized driver to comply with all driving restrictions and

Deleted: 9

Deleted: 2015

regulations which are imposed by the California Department of Motor Vehicles for County vehicle types.

- 6. Provide the County Risk Manager with a current list of drivers who are required by their jobs to have a commercial license. Those drivers with a commercial license are subject to the Federal Drug and Alcohol Testing Program.
- 7. Per California Vehicle Code 1808.1(k), drivers which are "...required to have a class A or class B driver's license, a class C with any endorsement..." shall be enrolled in the Department of Motor Vehicles Pull Notice Program. Each department is responsible to administer the Pull Notice Program for their drivers and shall provide the required reports to the California Highway Patrol when demanded.
- Follow Fleet Services' requirements for vehicle maintenance, including reporting vehicle parking location changes, timely reporting of vehicle accidents, and surrendering of vehicles for periodic repair and maintenance.
- Immediately upon notification that an authorized driver no longer meets the conditions listed in this Section, the department shall withdraw authorization and notify the individual.
- B. Assigned Vehicles. County vehicles may be assigned on a full-time or limited-time basis to an authorized driver or to a department. The department shall be responsible for;
  - Requests for Vehicles The department will submit a memo to the Public Works Fleet Manager ("Fleet Manager") requesting a vehicle assignment. The request should demonstrate that assignment of a County vehicle is the most cost effective option to meet transportation needs. If vehicles are unavailable, then the requesting department may provide funding for purchase or lease of a vehicle, with approval from the Office of the County Administrator. An electric <u>or plug-in hybrid</u> vehicle (EV) will be provided unless justification is approved for a non-EV by the Office of the Administrator.
  - 2. Vehicle Assignments Changes in vehicle parking locations and/or authorized drivers are to be reported to the Fleet Manager.
  - Vehicle Purchase Fleet Services is responsible for the development and maintenance of specifications for, and purchase of County vehicles. Such specifications shall provide for fuel efficiency, economy, and vehicle safety.
  - 4. Scheduled Maintenance The department is responsible for assuring that assigned vehicles receive maintenance as scheduled by the Fleet Manager. The department head and/or designee(s) must provide access to County vehicles upon request by Fleet Services for preventive maintenance and scheduled inspections to meet safety and regulatory compliance requirements. Failure to comply may result in confiscation of the vehicle(s).
  - 5. Vehicle Inspection- The department is responsible for assuring that equipment inspection checklists are completed for assigned vehicles on the schedule required by the Fleet Manager. Appendix B is a sample checklist. The inspection of vehicles must also be performed on the schedule required by the Fleet Manager.
- C. Take-Home Use of a County Vehicle. A take-home vehicle is any County vehicle, other than a "qualified non-personal use vehicle," described below, which is permanently or temporarily assigned to an authorized driver who has been

Formatted: Character scale: 105%

Formatted: Character scale: 105%

Formatted: Left, Space After: 6 pt, Outline numbered + Level: 3 + Numbering Style: 1, 2, 3, ... + Start at: 1 + Alignment: Left + Aligned at: 1" + Tab after: 1.5" + Indent at: 1.5" authorized to drive the County vehicle to and from work to the driver's residence. Take-home vehicle authorizations must be approved by the department head and must be based on demonstrable and beneficial needs for the delivery of services to the County.

1. A "qualified non-personal use vehicle" encompasses the following (IRS Code Publication 15-B):

a) Clearly marked, through painted insignia or words, police and fire vehicles;

b) Unmarked vehicles used by law enforcement officers, if the use is officially authorized;

c) An ambulance or hearse used for its specific purpose;

 Any vehicle designated to carry cargo with a loaded gross vehicle weight over 14,000 pounds;

e) Delivery trucks with seating for the driver only, or the driver plus a folding jump seat;

A passenger bus with a capacity of at least 20 passengers used for its specific purpose;

- g) School buses; and
- h) Tractors and other special-purpose farm vehicles.
- 2. In the event the department head authorizes the take-home use of any County vehicle, other than a qualified non-personal use vehicle, the authorized driver will be required to treat any personal use of that vehicle as taxable income under various IRS rules. The department is required to maintain detailed records of which authorized drivers may take home a County vehicle and how many nights each month those drivers took home a County vehicle.

#### II. OPERATION OF COUNTY VEHICLES.

- A. Authorized drivers may only use County vehicles to transport those persons, animals and/or equipment as are required to carry out official County business.
- B. An authorized driver shall immediately notify the department head, or designated representative, of any changes in the status of his/her driver's license.
- C. Authorized drivers may only use County vehicles for conducting County business, except when authorized for take-home use, as provided in Section I.C., above. Any other personal use of County vehicles is strictly prohibited.
  - 1. When a County vehicle is assigned to an authorized driver for take-home use, the driver to whom the vehicle is assigned shall be responsible for affording the maximum protection practicable against theft, vandalism, damage and the elements by placing such vehicle in a garage or carport, if available. The minimum of such protection shall be assurance that such vehicle is off-street, if available, at night, when not in actual use.
  - Take-home County vehicles may not be used to conduct personal business (e.g., driving children to daycare, doing shopping, or transporting other non-County passengers). Authorized drivers taking home a County vehicle shall ensure proper discretion to minimize inaccurate or negative public perceptions.
  - 3. Authorized drivers shall not permit other persons to drive County vehicles.
    - a) Drivers shall observe all traffic rules and regulations at all times,

**Deleted:** At the end of each month, the department must report this information to Fleet Services (925-313-7074).

including but not limited to refraining from using a cell phone while operating the vehicle. Fines and punitive measures imposed for violations are the personal responsibility of the driver.

b) Authorized drivers shall observe courtesies of the road, follow California Department of Motor Vehicles (DMV) Driver Handbook requirements, practice defensive driving procedures, and utilize fuel conservation measures.

c) Authorized drivers must ensure that all personnel riding in County vehicles wear safety seat belts. All California laws and DMV handbook updates for child and adult seatbelt requirements must be followed.

d) Smoking is prohibited at all times in County vehicles. Authorized drivers shall not consume food or beverages while operating a County vehicle.

e) Authorized drivers must take proper care to secure the County vehicle when the vehicle is left unattended, including locking the vehicle and removing the keys. The authorized driver should not leave valuables or County equipment (e.g., wallets, cell phones, laptop computers) in plain sight when a County vehicle is left unattended.

f) Authorized drivers of County vehicles equipped/supplied with traffic cones are required to comply with the guidelines stated in Administrative Bulletin No. 516, "Traffic Cones."

g) Authorized drivers are required to surrender vehicles for scheduled maintenance when requested.

h) If an authorized driver utilizing a Fleet Services daily use pool vehicle will be returning later than 5:00 p.m. to the Fleet Services Center, the authorized driver must notify Fleet Services, 2467 Waterbird Way, Martinez, (925) 313-7074. If a vehicle is not returned by the scheduled check-in time and no delay has been reported, an investigation to locate the vehicle may be initiated. The authorized driver's department will be contacted and local police agencies may be notified if the vehicle cannot be located.

i) Authorized drivers must remove all personal items from the vehicle, dispose of trash and litter, set the emergency brake when parking the vehicle being returned, and advise Fleet Services personnel of any maintenance problems and/or vehicle body damage.

j) Authorized drivers must wear appropriate footwear as required by the California Vehicle Code (CVC).

#### III. COUNTY VEHICLE SERVICING.

- A. Fleet Services is responsible for the regular maintenance and servicing of all Countyowned vehicles.
- B. County vehicles are serviced at 2467 Waterbird Way, Martinez. For after-hours emergencies, such as a flat tire or broken fan belt, County vehicles may be serviced by a private garage or service station. If the emergency occurs during normal work hours, the authorized driver is to call Fleet Services at (925) 313-7074 before having repairs made. Fleet Services' telephone number is stored in the glove compartment of each vehicle. The driver may be advised that the vehicle will be towed.
- C. When possible, County vehicles should be fueled at the automated fuel site at Fleet Services on Waterbird Way, Martinez, and at designated Voyager card facilities. Fleet Services will issue authorized drivers a Voyager card at the same time they are assigned a County vehicle. Replacement cards may be requested from Fleet

Services.

- D. County vehicles may be fueled at commercial service stations only in the event of emergency situations or when County service facilities are not accessible. Drivers are to use only self-service regular unleaded, or diesel fuel, as required. Purchase of premium unleaded fuel and full service are not permitted. Employees utilizing County or personal credit cards shall make certain that the County vehicle equipment number, vehicle license number, <u>odometer reading</u>, and total sales amount appear on all sales receipts. Employees using personal credit cards for fuel purchases shall include the signed sales receipts with their monthly expense demands.
- E. Vehicles using alternative fuels such as compressed natural gas (CNG) must be refueled at appropriate sites.
- F. Electric Vehicle Charging County electric vehicles (EVs) can be charged at County facilities that have EV charging stations or at commercially available charging stations. In County parking lots that include parking of County vehicles and employee owned vehicles, priority for use of EV charging stations shall be for County owned EVs. In County owned parking lots where the public has access to the charging stations, the public and employees have priority use of the charging stations.

IV. RENTAL PROCEDURES. The following procedures apply to obtaining a rental car once a department head, or designee, has authorized a County employee, contract worker, or volunteer to operate a rental vehicle for County work-related purposes: Employees should prioritize rental of electric vehicles where they are available:

- A. Rental Cars for In-County Use. The Public Works Department, Fleet Services Division ("Fleet Services"), is responsible for obtaining rental cars for in-County use. The department head, or designee, must contact Fleet Services at (925)313-7074 for further instructions.
- B. Rental Cars for Out-of-County Use. The Public Works Department, Purchasing Services Division, is responsible for obtaining rental cars for out-of-County use. The department head, or designee, must contact the Purchasing Division at (925)313-2000 for further instructions.

#### V. INSURANCE.

- A. County-Owned Vehicles. The County self-insurance program provides vehicle liability insurance coverage to authorized drivers during approved use of County vehicles.
- B. Rental Vehicles for County Work-Related Purposes. Rental vehicles are covered for liability and vehicle physical damage under the County's self-insurance program. Authorized rental car drivers are instructed not to purchase any insurance or sign a Collision Damage Waiver (CDW) when renting a vehicle for County business. However, if the authorized rental car driver keeps a rental vehicle for personal use, after the business portion of the trip is completed (unless they are attending an approved extended conference, seminar, etc.), the driver is responsible for the vehicle and should arrange for his or her own liability and collision coverage.

#### VI. ACCIDENTS. A. Types

- Types of Accidents.
  - 1. Bodily Injury;
  - Vehicle being struck or striking another vehicle or object and/or damage occurring as a result of an accident; or
  - All other vehicle accidents involving County vehicles, including those that occur when the vehicle is unattended.

Formatted: Character scale: 105%

#### Formatted: Character scale: 105%

Formatted: Character scale: 105%

#### B. Reporting.

- 1. Authorized drivers of County vehicles that are involved in accidents must follow the Post Vehicle Accident Instructions, attached as Appendix C.
- 2. Authorized drivers must immediately notify the following:
  - a) Immediate Supervisor
  - b) Fleet Services at (925) 313-7074
  - c) Risk Management at (925) 335-1400
- 3. Authorized drivers must also complete a Vehicle Accident Report Form, Appendix D, and submit it to his or her supervisor.

a) When possible, take photos of the accident scene and vehicle damage and submit the photos with the Vehicle Accident Report Form.

b) The report shall be submitted to the driver's supervisor within 24 hours, or as soon as possible.

c) The supervisor shall review the report, follow the department's accident investigation procedure, and/or forward the report to the department head.

<u>d)</u> The department head shall send copies to Risk Management's Liability Unit and Fleet Services for claims review, assessment of vehicle condition, possibility of mechanical or electrical malfunction, and damage estimate.

- C. Bodily Injury.
  - In cases of bodily injury to either party, authorized drivers must also complete a DWC-1 form, which is available through Risk Management, in addition to the Vehicle Accident Report Form.
  - Instructions to Supervisors.

a) Ensure that the employee involved in an accident has completed all the proper paperwork.

b) Complete an AK30 form, which is available through Risk Management. Return both the DWC-1 form completed by the employee and the AK30 form to the Risk Management Office within 24 hours of the accident or as soon as possible.

- D. Departmental Evaluation.
  - Accident Review. The department head or designated representative must investigate all accident reports to determine what actions may prevent future accidents. The department must record is findings and relevant points of its evaluation on the Vehicle Accident Report Form and submit the form to Risk Management.
  - Review and Action. The department head or designated representative is responsible for implementing follow-up actions to prevent future accidents, including, but not limited to, trainings, corrective counseling, and discipline.
- E. Risk Management provides a training program for those individuals referred by their Departments for repeated vehicle accidents in County vehicles. An overview for the training program is provided in Appendix E.

#### CONTRA COSTA COUNTY Office of the County Administrator ADMINISTRATIVE BULLETIN

 Number:
 508.6

 Date:
 June 2, 2021

 Section:
 Property and Equipment

SUBJECT: County Vehicle and Equipment Acquisition and Replacement Policy, and Clean Air Vehicle Policy and Goals

This bulletin sets forth County policy and guidelines for department requests for acquisition and replacement of County vehicles and equipment.

- I. APPLICABILITY. This bulletin is applicable to addition and replacement vehicles and equipment to be acquired by County departments either through purchase, lease purchase or donation.
- II. AUTHORITY. By Board Order, Item C.162, July 18, 2000, proposed County Vehicle/Equipment Acquisition and Replacement Policy

#### **III. POLICY GUIDELINES**

Additional and replacement vehicles and equipment to be acquired by County departments either through purchase, lease purchase or donation must be appropriate for the intended use, within the approved budget, safe to operate, and cost efficient both to operate and maintain. The expected annual use of any vehicle should be in excess of 3,000 miles. Dedicated Compressed Natural Gas (CNG) and battery electric vehicles with frequent and demonstrated short trip usage patterns may be exempted from the County minimum mileage requirement. Replacement priority will be given to vehicles and/or equipment that are determined by the Public Works Department Fleet Manager (Fleet Manager) to be unsafe, in the poorest condition, uneconomical to operate or maintain, or have the highest program need. Unless otherwise approved by the County Administrator's Office, all new and/or replacement vehicles shall be battery electric vehicles (BEV) or plug-in hybrid vehicles.

A. <u>ACQUISITION OF REPLACEMENT VEHICLES/EQUIPMENT</u> The acquisition of "replacement" vehicles or equipment may be approved by the Fleet Manager and County Administrator, provided that the vehicle being replaced meets or exceeds the minimum mileage criterion and/or the vehicle/equipment is damaged beyond economical repair as determined by the Fleet Manager.

Vehicles and equipment will be considered for replacement or, in the case of low utilization, reassignment to another function or department, when one or more of the following conditions exist as determined by the Fleet Manager. 1. Replacement parts are no longer available to make repairs

Page 1 of 5

| Deleted: November 17, 2 | 2015 |
|-------------------------|------|

Formatted: Indent: Left: 0"

Deleted: 1

- 2. Continued use is unsafe
- 3. Damage has made continued use infeasible
- 4. Cost of repair exceeds the remaining value
- 5. Low utilization (usage does not exceed 3,000 miles per year) cannot justify ongoing maintenance and insurance costs
- B. <u>MILEAGE EVALUATION INTERVALS</u> At the mileage intervals specified below, vehicles will be evaluated to determine their condition and expected life. The Fleet Manager is to make such evaluations in accordance with the following schedule. Evaluations may be conducted sooner under certain conditions, such as when a vehicle needs repairs more often than other vehicles of the same class and age, or when a vehicle has been damaged. After initial evaluations, a vehicle will be re-evaluated every 12,000 miles or until it reaches the end of its life, at which time it will be declared surplus.

| VEHICLE TYPE             | EVALUATION INTERVAL                    |
|--------------------------|--|
| Sedans                   | 90,000 miles                           |
| Sheriff Patrol Sedans    | 90,000 miles                           |
| Passenger Vans           | 90,000 miles                           |
| Cargo Vans               | 90,000 miles                           |
| Sports Utility Truck     | 100,000 miles                          |
| Pickups and 4x4          | 100,000 miles                          |
| Medium/Heavy Duty Trucks | 120,000 miles                          |
| Buses                    | 180,000 miles                          |
| School Buses             | 8 years/(inspect every 45 days by law) |
| Miscellaneous Equipment  | Depends on Condition                   |

- C. EQUIPMENT ABUSE, NEGLIGENCE, AND MISUSE Departments utilizing County equipment shall be responsible for all costs associated with driver abuse, negligence, or misuse of County equipment. Determination of abuse, negligence, or misuse will be at the discretion of the Fleet Manager. The Fleet Manager shall notify the department using the equipment of any charges covered under this section.
- D. <u>VEHICLE CITATIONS, PARKING TICKETS, AND TOLL EVASION NOTICES</u> The department utilizing the equipment shall be responsible for ensuring payment of all citations, parking tickets, and toll evasion notices attributed to any equipment. Citations or tickets attributed to equipment due to administrative reasons (license, titling, registration, etc.) will be the responsibility of the Fleet Manager to resolve, with the exception of expired registration tabs on undercover vehicles. The department utilizing the equipment is responsible for ensuring undercover plated vehicles display a current registration tab.

E. <u>ACQUISITION OF ADDITIONAL VEHICLES/EQUIPMENT</u> Departments requesting acquisition of an additional vehicle or piece of equipment must demonstrate the need and identify the source of funding for the acquisition and its ongoing maintenance. Funds for the acquisition of additional or replacement vehicles/equipment must be appropriated in the County budget before such acquisition can occur. This appropriation may be included in the annual County Budget adopted by the Board of Supervisors or may occur via a budget appropriation adjustment approved by the Board during the fiscal year. The attached form shall be used for each <u>Vehicle and Equipment Request Form</u> and forwarded to the County Administrator's Office, Budget Division, upon whose approval the request will be sent to the Fleet Manager for technical recommendations.

Any vehicle and/or equipment that is offered as a donation to the County must be inspected by the Fleet Manager and determined to be in good operating condition, safe, and efficient to operate and maintain prior to acceptance. If the vehicle does not meet these criteria, the donation is not to be accepted. Donated vehicles and equipment require a signed Board Order before the donated equipment may be accepted.

#### IV. CLEAN AIR VEHICLE POLICY AND GOALS

It is the intent of the County to procure the most fuel efficient and lowest emission vehicles and reduce petroleum fuel consumption. Vehicle and equipment purchases shall be operable on available County alternate fuel sources to the greatest extent practicable and must comply with all applicable clean air and vehicle emission regulations. Department locations that have electric vehicle charging stations available shall utilize electric vehicles to the greatest extent possible unless there is a compelling documented reason an electric vehicle (EV) does not meet operational needs that is approved by the CAO. As building facilities become equipped with EV charging stations, the Fleet Manager shall replace non-electric vehicles with EVs. To accelerate the integration of EV's, the Fleet Manager may reassign existing non-EVs to another department and replace with an EV.

A. <u>VEHICLE PURCHASES</u> Alternate fuel (electric, Compressed Natural Gas (CNG), fuel cell, etc.) vehicles shall be procured to the greatest extent practicable. If an alternate fuel vehicle is not operationally feasible, a <u>pluq-in</u> hybrid, vehicle shall be the next type considered for procurement. Vehicle purchases other than alternate fuel or <u>pluq-in</u> hybrid, require specific justification and approval by the <u>County Administrator's Office</u> and shall be rated no lower than Partial Zero Emission Vehicle (PZEV) by the California Air Resources Board when possible.

| Deleted: electric      |  |
|------------------------|--|
| Deleted: electric      |  |
| Deleted: Fleet Manager |  |

B. <u>EXEMPTION FROM CLEAN AIR VEHICLES POLICY</u> Marked emergency response vehicles (e.g. police patrol, fire, paramedic, and other Code 3 equipped units), may be exempt from the Clean Air Vehicle Policy. The Fleet Manager may also grant exemptions for vehicles used primarily for prisoner transport or when no alternate fuel or low emission vehicle is available that meets the essential vehicle requirements or specifications. The intended use of the vehicle shall be the determining criteria for granting a Clean Air Vehicle Policy exemption.

#### V. DEPARTMENT RESPONSIBILITY

- A. Department Head or Designee assigned vehicles
  - 1. Designate a department staff person to serve as the departments point of contact for all fleet related issues
  - 2. Ensure safe operation of all vehicles and bringing in vehicles to the Fleet Services Center for scheduled preventative maintenance and safety inspection when requested by the Fleet Manager
  - 3. Budget appropriately for all expenses
  - Prepare and submit <u>Vehicle and Equipment Request Form</u> to the County Administrator's Office, Budget Division for approval of replacement and/or addition of vehicles
  - 5. Enter correct mileage when purchasing fuel
  - 6. Ensure vehicle meets minimum use guidelines
  - 7. Notify Fleet Manager of any vehicle assignment changes
- B. County Administrator's Office
  - 1. Review requests for purchase of vehicles for operational need, compliance with County policy, and budgetary impact
- C. Public Works Department Fleet Services Division
  - 1. Administer and oversee the County Fleet including providing regular preventative maintenance and repairs
  - 2. Budget for the acquisition and replacement of vehicles and/or equipment
  - Prepare annual report and summary of the distribution of light vehicles (by vehicle type (sedan, SUV, van, pickup truck, etc.) and fuel (electric, CNG, unleaded, diesel, hybrid) and heavy equipment by department for the

Formatted: Left

Page 4 of 5

current fiscal year, the two prior fiscal years, and the recommended distribution for the new fiscal year

- 4. Develop light duty vehicle and equipment specifications to increase alternate fuel (electricity, CNG, fuel cell, etc.), all electric, plug-in hybrids, and partial zero or less emission vehicle purchases.
- 5. Identify and procure suitable alternate fuels for use in County vehicles
- 6. Monitor and identify non-County alternate fuel locations for use by County vehicles
- 7. Identify opportunities for multiple departments to share all electric vehicle motor pools centrally located at hubs consisting of County owned parking lots equipped with electric vehicle charging stations

## Contra Costa County Board of Supervisors

## Subcommittee Report

| SUSTAINABILITY COMMITTEE |  |      |  |
|--------------------------|--|------|--|
| Meeting Date:            | 07/26/2021   |      |  |
| <u>Subject:</u>          | RECEIVE REPORT on County Active Transportation Plan and PRO<br>DIRECTION as needed.        | VIDE |  |
| <b>Department:</b>       | Public Works   |      |  |
| <b>Referral No.:</b>     |  |      |  |
| <b>Referral Name:</b>    | <u>RECEIVE REPORT</u> on County Active Transportation Plan and PRO<br>DIRECTION as needed. | VIDE |  |
| Presenter:               | Alexander Zandian, Department of Public Contact: Jerry Fahy<br>Works (925)313-2276         | I    |  |

### **Referral History:**

The County's Climate Action Plan and related data and documents identify emissions from the transportation sector as a major source of greenhouse gas emissions in Contra Costa County. The 2015 Climate Action Plan identifies the expansion of bicycle and pedestrian facilities as an action item. In the community outreach in which staff has engaged for the updates to the General Plan and Climate Action, community members have been clear that increased access to safe bicycle, pedestrian, and transit continue to be priorities. The Interim Climate Action Work Plan for 2021-2022 names as a goal the completion and adoption of the County's Active Transportation Plan.

### **Referral Update:**

The Contra Costa County Public Works Department is in the process of developing an Active Transportation Plan for the unincorporated County. Public Works presented on the Active Transportation Plan at the June 28, 2021 meeting of the Sustainability Commission, which has been studying the status of the active transportation network in Contra Costa County.

### **Recommendation(s)/Next Step(s):**

RECEIVE REPORT on County Active Transportation Plan and PROVIDE DIRECTION as needed.

### Fiscal Impact (if any):

No fiscal impact at this time.

## Contra Costa County Board of Supervisors

## Subcommittee Report

### SUSTAINABILITY COMMITTEE

| <b>Meeting Date:</b>  | 07/26/2021   |
|-----------------------|--|
| Subject:              | RECEIVE REPORT from Sustainability Coordinator.  |
| <b>Submitted For:</b> | Jody London, Sustainability Coordinator  |
| <b>Department:</b>    | Conservation & Development   |
| <b>Referral No.:</b>  |  |
| <b>Referral Name:</b> | RECEIVE REPORT from Sustainability Coordinator.  |
| Presenter:            | Jody London, Department of Conservation and<br>Development - SustainabilityContact:Jody London (925)655-2815 |

### **Referral History:**

This is a standing item of the Committee.

### **Referral Update:**

Key activities since the Sustainability Committee's last regular meeting on May 24, 2021, are listed below.

- Staff is working on implementation of the actions directed in the Climate Emergency Resolution, particularly the Interdepartmental Climate Action Task Force and the process to plan for a Just Transition. Staff is working on next steps for the Task Force, which is scheduled to report to the Board again around September.
- Sustainability staff continue to support the General Plan update.
- Sustainability staff are resuming work on the update to the County's Climate Action Plan. We are revising the schedule to ensure opportunities for community engagement.
- The Contra Costa Asthma Mitigation Project, a collaboration between Department of Health, the Department of Conservation and Development, and MCE, presented at the June 23 Sustainability Exchange meeting (a professional learning and networking forum for local government staff in Contra Costa County who work on sustainability issues).
- The Asthma Mitigation Project has been awarded a \$200,000 EPA Environmental Justice grant to provide funding to Lifelong Medical Clinic and La Clinica to train their Health Promoters and Promotoras to provide their clients in-home asthma trigger education and to engage their community on air quality issues. The Asthma Mitigation Project has also applied for a grant with the Bay Area Air Quality Management District to expand the Asthma Mitigation Project to specifically serve clients living in areas affected by traffic pollution.
- County permitting staff presented on how the County has adapted its permitting practices during the pandemic at a Bay Area Regional Energy Network forum on Building Permits and Clean Technology: Innovations and Challenges.
- Evaluated proposals for consulting services to support Healthy Lands, Healthy People, the

carbon sequestration feasibility study funded through a grant from the California Department of Conservation. We are in the process of executing agreements with our partners, the Contra Costa Resource Conservation District and the University of California Cooperative Extension. We hope to have all contracts in place by August.

- Transportation Planning staff is currently conducting the Carquinez Strait Scenic Loop Trail Study. The study looks at opportunities to close three existing gaps in the Carquinez Strait Scenic Loop Trail (<u>link</u>) in Contra Costa County: southern end of the Benicia Bridge, Downtown Martinez to the George Miller Trail, and the George Miller Trail to Crockett.
- Active Transportation Plan Update: Public Works staff presented to the Sustainability Commission on June 28. Since this time, County staff has been working with the consultant on what additional public outreach can be conducted, considering the additional cost and impact on meeting all deliverables within the tight timeframe. Additional ideas proposed by the consultant include in-person pop-up events at already established venues like farmers markets, additional presentations at committee meetings such as MAC meetings, in-person charrettes with advocacy groups, and development of an engagement toolkit. As mentioned at the Sustainability Commission meeting, Caltrans has set a firm date of February 2022 before all deliverables of the grant must be met; the request for a time extension due to the COVID-19 pandemic was denied. In addition to increased public outreach efforts, collaboration is ongoing with the consultant on what relevant information will be depicted on the existing conditions web map of our active transportation infrastructure. Such information will be useful when establishing priority projects within the County.
- Public Works staff completed the Rodeo Pedestrian Enhancement Project, which improves accessibility and safety for pedestrians. See attached photos.
- Staff across departments continue to plan for SB 1383, legislation regarding solid waste that goes into effect January 1, 2022.
- Met with staff from both MCE and the California Solar on Multifamily Housing regarding programs focused on bringing more solar energy to multi-family housing developments.
- Nicole Shimizu, our Climate Corps Fellow, completed her fellowship on July 15. She has been a tremendous addition to our team and we wish Nicole well as she starts a full-time job. A new Climate Corps Fellow will start in September.
- Frank DiMassa, the County's Energy Manager, is retiring July 31. Under Frank's leadership the County has continued to improve County facilities: contributing to the design of the new Administration Building and Emergency Operations Center; installing energy efficient lighting in County buildings; installing additional solar energy and battery storage; helping develop new building design guidelines and plans for electric vehicle charging. Thank you, Frank!
- Staff hosted Lunch and Learn sessions for County staff with graduate students from UC Berkeley who did capstone projects with the County. The first student reported on options for financing investments by low- and moderate-income homeowners in energy efficiency and clean energy. The second student studied options for Climate Resilience Districts that can fund investments in green infrastructure and related community improvements. Both reports can be found at https://www.contracosta.ca.gov/7025/Planning-for-our-Future.
- Participated in professional learning opportunities regarding environmental justice, carbon sequestration, communication and facilitation strategies, race and equity, and related.
- Collaborated with County staff working on topics including land use and transportation, hazardous materials, green business program, the County's state and federal legislative platforms, economic development, health, codes, solid waste, energy, and related.
- Participated in regional activities.
