**SECTION I**

**INTRODUCTION**

**CONTRA COSTA COUNTY**  
**ASSESSMENT DISTRICT 1979-3 (LL-2)**

**FISCAL YEAR 2023-24**

To ensure the proper flow of funds for the ongoing operation, maintenance, and servicing of specific existing and proposed improvements within the boundaries of Contra Costa County, the Board of Supervisors, through the Landscaping and Lighting Act of 1972, approved the formation of Assessment District 1979-3 (LL-2) (the "District"). Existing and proposed improvements that may be constructed, operated, maintained, and serviced by the District are generally described as:

*The maintenance and servicing of landscaping (street frontage and medians) and related appurtenant facilities (including irrigation and electrical facilities). The existing and proposed improvements also include the maintenance of park and recreation improvements (including landscaped areas, picnic areas, open space, playground equipment, lighting, ballfields, paths, trails, and pedestrian bridges).*

Generally, developers, as a part of their conditions permitting the developer to construct new housing or commercial/industrial developments, construct these aforementioned public improvements. However, the ongoing maintenance of these various improvements are financed through the District. The District is composed of "Benefit Zones" to ensure that the maintenance of the improvements are specifically paid for by those property owners who directly benefit from the improvements.

As required by the Landscaping and Lighting Act of 1972, the annual engineer's report must be reviewed by the Board of Supervisors each year and includes: (1) plans and specifications for the improvements, (2) an estimate of the costs of the improvements, (3) a diagram of the assessment district and any associated zones, (4) a description of the method used to apportion costs of the improvements to the benefiting parcels, and (5) a property list which includes the proposed assessments to be levied upon each assessable lot or parcel within the District.

The Contra Costa County Board of Supervisors will hold a Public Hearing, June 13, 2023, regarding the District and proposed Fiscal Year 2023-24 annual assessments to be levied, to provide an opportunity for any interested person to be heard. At the conclusion of the Public Hearing, the Contra Costa County Board of Supervisors may adopt a resolution confirming the levy of assessments as originally proposed or modified. Following the adoption of this resolution, the final Assessor's roll will be prepared and filed with the County Auditor's office to be included on the Fiscal Year 2023-24 tax roll.

Payment of the assessment for each parcel will be made in the same manner and at the same time as payments are made for property taxes. All funds collected through the assessment must be placed in a special fund and can only be used for the purposes stated within this report. In addition to the existing Benefit Zones, new Benefit Zones may be created throughout the fiscal year as development is processed. Table 1 below indicates those Benefit Zones that have been annexed into the District or modified since the prior year's annual report was prepared in Fiscal Year 2022-23.

**Table 1 – Benefit Zones modified since Fiscal Year 2022-23**

<b>Benefit Zone</b>	<b>Comment</b>
Not Applicable	No new zones of benefit have been created, nor have any parcels been annexed into an existing benefit zone during Fiscal Year 2022-23.

**Benefit Zones with Maximum Assessment Rate increases for Fiscal Year 2023-24**

Benefit Zones No. 5, 35, 54, 69, 70, 71, 74 and 75 had their maximum assessment rates increased 5.30% over the Fiscal Year 2022-23 rates. These benefit zones can be increased each fiscal year by the annual change in the Consumer Price Index for the San Francisco Bay Area – All Urban Consumers (CPI). For Fiscal Year 2023-24 the CPI increased from 320.195 to 337.173, which equals an increase of 5.30%.

Public playground safety and accessibility standards are mandated by two legal requirements. The Americans with Disabilities Act (ADA) of 1990, which became effective in 1992 and required all public facilities (including playgrounds) be free of architectural barriers to access by January 1, 1995. Secondly, California Playground Safety Regulations R-39-97, mandated compliance with federal playground safety standards by the year 2000. This law requires that all playground equipment areas accessible to the public be audited/inspected for safety. These standards are established by the American Society for Testing and Materials (ASTM) in their document "Standard Consumer Safety Performance Specification for Playground Equipment for Public Use", and by the Federal Consumer Products Safety Commission (CPSC) in their document "Public Playground Handbook for Safety". Landscape and lighting zones that have existing playground equipment that does not meet these Federal and state guidelines must either retrofit or replace that equipment.

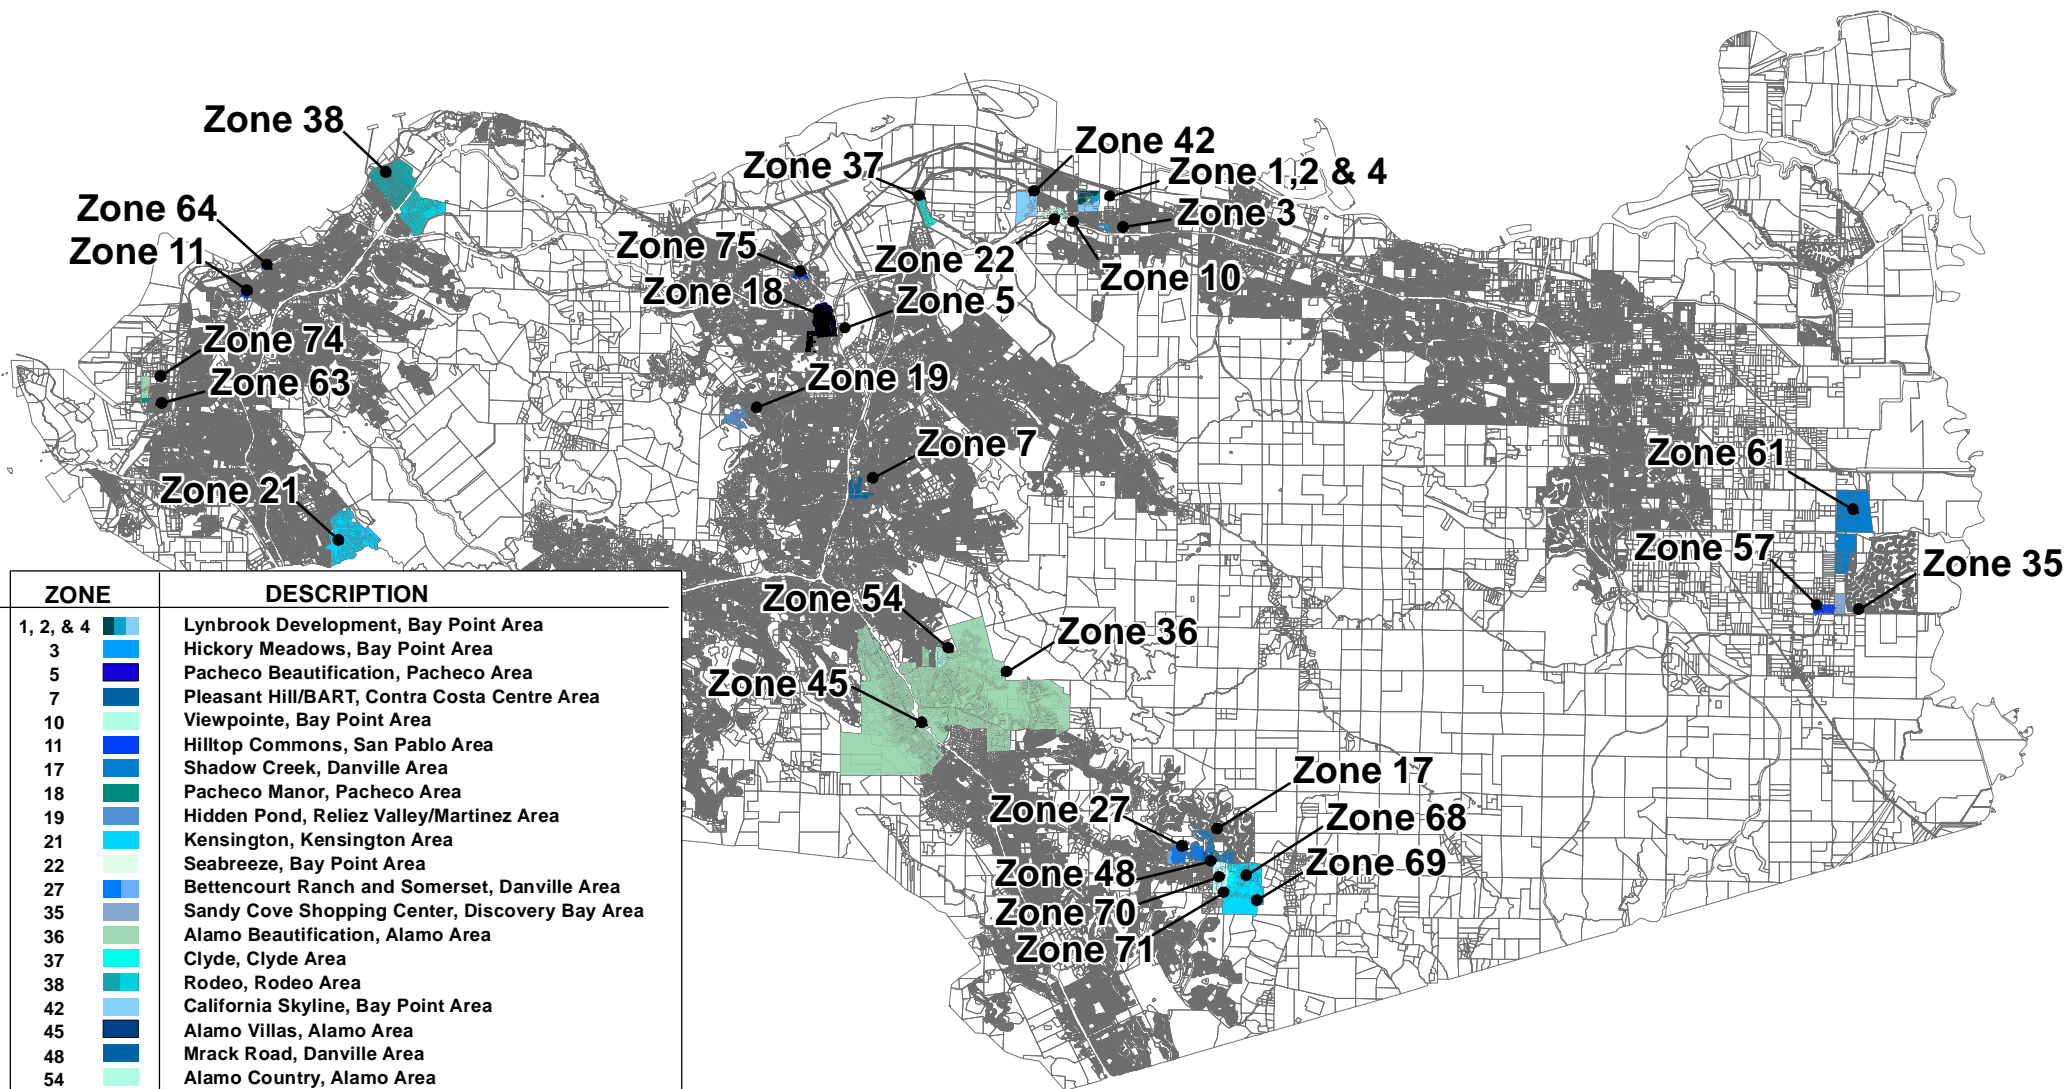

The Landscaping and Lighting Act of 1972 requires that a special fund be set up for the revenues and expenditures of each Benefit Zone. Funds raised by the assessments shall only be used for the purpose as stated herein. A contribution to each Benefit Zone by Contra Costa County may be made to reduce the assessments, as the Board of Supervisors deems appropriate. Any balance remaining on July 1 at the end of the fiscal year must be carried over to the next fiscal year.

**ASSESSMENT DISTRICT DIAGRAM**

The boundaries of the Assessment District 1979-3 (LL-2) for Fiscal Year 2023-24 are completely within the boundaries of Contra Costa County. The Assessment Diagram for the Assessment District 1979-3 (LL-2) is on file in the Office of the Contra Costa County Clerk of the Board of Supervisors and the Contra Costa County Public Works Department. The lines and dimensions of each lot or parcel within the District are those lines and dimensions shown on the maps of the Contra Costa County Assessor, for the year when this report was prepared, and are incorporated by reference herein and made part of this report as shown in Appendix "B".

## **PART D**

### **METHOD OF APPORTIONMENT OF ASSESSMENT**

This section explains the benefits to be derived from the improvements and the methodology used to apportion the total assessments to the properties within the District.

The method used for apportioning the assessment is based upon the relative special benefits to be derived by the properties in each Benefit Zone of the District over and above the general benefits conferred on real property or to the public at large. The assessment is apportioned to each parcel in proportion to the relative cost of the special benefits from the improvements.

#### **Discussion of Benefit**

Part 2 of Division 15 of the Streets and Highways Code, the Landscaping and Lighting Act of 1972, permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements, which include the maintenance, servicing of landscaping, and parks and recreation improvements.

Section 22573 of the Landscaping and Lighting Act of 1972 requires that maintenance assessments must be levied according to benefit rather than according to assessed value. This Section states:

*"The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefit to be received by each such lot or parcel from the improvements."*

*"The determination of whether or not a lot or parcel will benefit from the improvements shall be made pursuant to the Improvement Act of 1911 (Division 7 (commencing with Section 5000)) [of the Streets and Highways Code, State of California]."*

In addition, the Landscaping and Lighting Act of 1972 permits the designation of zones of benefit within any individual assessment district if "by reasons or variations in the nature, location, and extent of the improvements, the various areas will receive different degrees of benefit from the improvement" (Sec. 22574). Thus, the Landscaping and Lighting Act of 1972 requires the levy of a true "assessment" rather than a "special tax."

Article XIID, Section 4(a) of the California Constitution (also known as Proposition 218, approved by the California voters in November 1996) limits the amount of any assessment to the proportional special benefit conferred on the property.

*"No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel."*

In addition, Article XIID also provides that publicly owned properties must be assessed unless there is clear and convincing evidence that those properties receive no special benefit from the assessment. Exempted from the assessment would be the areas of public streets, public avenues, public lanes, public roads, public drives, public courts, public alleys, public easements and rights-of-ways, public greenbelts and public parkways, and that portion of public property that is not developed and used for business purposes similar to those for private, commercial, industrial, and institutional activities.

### **Special versus General Benefit**

On November 5, 1996, California voters approved Proposition 218 entitled "Right to Vote On Taxes Act" which added Articles XIIC and XIID to the California Constitution. While its title refers only to taxes, Proposition 218 establishes new procedural requirements for fees, charges, and benefit assessments.

These new procedures stipulate that even if charges or benefit assessments are initially exempt from Proposition 218, future increases in the charges or benefit assessments must comply with the provisions of Proposition 218. However, if the future increase in the charge or benefit assessment were anticipated in the charge or benefit assessment formula when approved by property owners (e.g., consumer price index increases or a predetermined cap) then the future increase in the charge or benefit assessment would be in compliance with the intent and provisions of Proposition 218.

Proposition 218 provides that "only special benefits are assessable" and defines a special benefit as a particular and distinct benefit conferred on real property and not a general benefit received by the public at large. Parcels located within the boundaries of the District will be assessed for the operation, maintenance and capital replacement costs associated with landscaping and park improvements as described herein, if they receive a special and direct benefit from the improvements. Furthermore, the identification and separation of general benefits from the special benefits follows for the District and the associated Benefit Zones.

In the absence of an annual assessment, the improvements in each Benefit Zone of the District would not be provided, therefore the improvements are "over and above" what is being provided in other portions of the County as part of the Public Works Facilities Division. All assessment proceeds derived from each Benefit Zone are utilized to fund the cost of providing a level of tangible "special benefits" in the form of proximate landscaping and other permanent public improvements. The assessments are also structured to provide specific improvements within each Benefit Zone, further ensuring that the improvements funded by the assessments are of specific and special benefit to property within each Benefit Zone.

Specific benefits conferred on property include:

- Unique proximity to improved landscaped areas;
- Access to improved landscape and park and recreation areas;
- Improved aesthetic views within each Benefit Zone; and
- Extension of a property's outdoor area due to the properties being in close proximity to the landscape and park improvements.

Properties outside the District's Benefit Zones do not enjoy the unique proximity, access, views, and other special benefits described previously. Moreover, many of the homes and other improvements on parcels in the Benefit Zones would not have been built if the assessments were not established, because an assessment for public landscaping and parks and recreation was a condition of approval for the associated developments. Without the annual assessments, the public improvements and annual maintenance provided within the Benefit Zones would not exist and the areas would turn into unmaintained and unusable public improvements and public lands. If this happened, it would create a significant and material negative impact on the desirability, utility, and value of property in the Benefit Zone. The improvements are, therefore, clearly above what otherwise would be provided. In fact, it is reasonable to assume that if assessments were not collected and the improvements were not maintained as a result, properties in the Benefit Zones would decline in desirability, utility, and value by significantly more than the amount of the assessments.

Although these improvements may be available to the public at large, the public landscaping, parks and recreation, and other public improvements in each Benefit Zone of the District were specifically designed, located, and created to provide additional and improved public resources for the direct advantage of property inside each Benefit Zone, and not the public at large. The boundaries of the Benefit Zones have been narrowly drawn to include only those parcels that receive a direct advantage from the improvements.

In addition to the special and direct benefits the property owners receive within each of the Benefit Zones from these enhanced landscaping and park and recreation improvements, there are also some incidental visual benefits received by vehicular and pedestrian traffic, or flow-through traffic which may pass by the landscaping and park and recreation improvements within the District. Even though these are incidental benefits, they must be accounted for and cannot be assessed to the properties within the District and each associated Benefit Zone. Therefore, based on flow-through traffic, it is conservatively estimated that approximately 99% of the annual cost to operate and maintain the landscaping and parks and recreation improvements would be a special and direct benefit to the parcels within the District and one percent of the annual cost to operate and maintain the landscaping and park improvements would be a general benefit.

It is therefore concluded that all the landscape improvements funded by the assessments confer special benefits to the identified benefiting properties located within the District and each associated Benefit Zone and that the value of the special benefits from such improvements to property in the Benefit Zones reasonably exceeds the cost of the assessments for every assessed parcel in a Benefit Zone. In other words, as required by

Proposition 218, the reasonable cost of the proportional special benefit conferred on each parcel reasonably exceeds the cost of the assessments.

Furthermore, the County owns, maintains, rehabilitates, and replaces curb, and gutter along the border of each of the Benefit Zone improvements. These curb and gutters serve to support, contain, retain, manage irrigation flow, and plant growth, and provide a boundary for the improvements. The contribution from the County towards general benefit from the maintenance, rehabilitation and replacement of the curb and gutter is conservatively estimated to be at least one percent.

### **PARKS AND RECREATION BENEFIT DETERMINATION**

The overall quality of life and desirability of an area is enhanced when public parks and recreation facilities are in place, improved, and maintained. Conversely, property desirability decreases when park and recreational facilities are unsafe or destroyed by the elements or vandalism.

Property desirability in an area also increases when there is an increase in the number of parks, recreation centers, and sports facilities. These park and recreational facilities enable property owners to participate in sporting events, leisure activities, picnics, organized social events, and other miscellaneous activities.

Studies in a number of communities, including counties and cities throughout the United States, have indicated that recreation areas and facilities, if well maintained and wisely administered, have caused a marked increase in the property values of parcels in the community. Consequently, such park and recreation facilities have proved to be an important factor in maintaining a sound economic condition and a high standard of livability in the community. These studies confirm the opinion long held by planning authorities as to the economic value of parks and recreational facilities in a community.

*"The recreation value is realized as a rise in the value of land and other property in or near the recreation area, and is of both private interest to the landowner and others, holding an economic stake in the area, and of public interest to the taxpayers, who have a stake "* (National Recreation and Park Association, June 1985)

*"Recreation and park amenities are central components in establishing the quality of life in a community... [businesses'] main resource is their employees for whom quality of life is an important issue. The availability and attractiveness of local parks and programs influences some company's relocation decisions... the presence of a park encourages real estate development around it."* (California Parks & Recreation, Winter 1997)

The benefit of parks and other recreational facilities to residential and commercial/industrial properties has been summarized by a number of studies. The United States Department of the Interior, National Park Service, in a publication of June 1984, concluded that:

- "Parks and recreation stimulate business and generate tax revenues."
- "Parks and recreation help conserve land, energy, and resources."
- "An investment in parks and recreation helps reduce pollution and noise, makes communities more livable, and increases property values."
- "Public recreation benefits all employers by providing continuing opportunities to maintain a level of fitness throughout one's working life, and through helping individuals cope with the stress of a fast-paced and demanding life."

Proper maintenance and operation of the parks within the District benefits those properties within the service areas of the parks by providing environmental quality and recreational enhancement. The amount of benefit received will vary with the different land use on the property. There are two categories from which the total benefit of a parcel is derived:

- 1. Environmental Quality Benefit.** The improvement of the quality of air, visual aesthetics, and attractiveness of the community as a place to live and work and do business.
- 2. Recreation Enhancement Benefit.** The availability and access to usable and safe park and recreational facilities.

Recent studies have shown that adequate parks and recreation facilities and recreation programs help to reduce crime and vandalism. This results in savings to property owners and improved property values and promotes the well-being of the community.

### **LANDSCAPING BENEFIT DETERMINATION**

Trees, landscaping, hardscaping, and appurtenant facilities, if well maintained, provide beautification, shade, and enhancement of the desirability of the surroundings. In *Parkways and Land Values*, written by John Nolan and Henry V. Hubbard in 1937, it is stated:

*"... there is no lack of opinion, based on general principals and experience and common sense, that parkways do in fact add value to property, even though the amount cannot be determined exactly. Indeed, in most cases where public money has been spent for parkways the assumption has been definitely made that the proposed parkway will show a provable financial profit to the City. It has been believed that the establishment of parkways causes a rise in real estate values throughout the City, or in parts of the City..."*

It should be noted that the definition of "parkways" above may include the roadway as well as the landscaping alongside the roadway.

Proper maintenance and operation of the street landscaping provides beautification and enhancement of the desirability of surroundings. The Benefit Zones in the District enjoy a reputation for beauty, and the landscape improvements along the major thoroughfares in the medians and parkways enhance that reputation and benefit all parcels in each Benefit Zone. These major thoroughfares are the entryways into the various Benefit Zones and as such provide beautification to the entire Benefit Zone.

### **ASSESSMENT METHODOLOGY**

The total operation, maintenance, and servicing cost for the landscaping and public park and recreation facilities are apportioned in accordance with the methodology that is consistent with standard assessment engineering practices. The method for spreading the costs to each parcel is based on the Equivalent Dwelling Unit (EDU) factor, with the exception of Benefit Zone 7 assessments, which are assessed on potential floor area for commercial/industrial parcels and Benefit Zone 35 assessments which are assessed on acreage.

Since the assessment is levied on the owners of properties as shown on the tax rolls, the final charges must be assigned by Assessor's Parcel Number. If assessments were to be distributed by parcel, not considering land use, this would not be equitable because a single-family parcel would be paying the same as a 50-unit apartment parcel or a large commercial establishment. Therefore, as previously stated, the total assessment costs are distributed to each parcel of land based on the number of EDUs associated with each particular parcel.

Commercial and industrial parcels benefit similarly to residential parcels because of increased property values and the ability to have their workers and patrons use the park and recreation facilities. Commercial and industrial parcels are assessed based on their acreage because larger parcels have the ability to generate larger pedestrian flows. The methodology used to assign EDUs to other land uses in proportion to the benefit they receive relative to the single-family residential parcel is shown below.

**Developed Single Family Residential** - The developed single-family parcel has been selected as the basic unit for calculation of the benefit assessments. This basic unit shall be called an **Equivalent Dwelling Unit (EDU)**. Parcels designated as developed single family residential uses per the Contra Costa County land use code are assessed one (1.00) EDU.

**Developed Multiple Residential** - The EDUs for land designated as developed multi-family uses which includes townhomes, condominiums, mobile homes, and apartments are assessed a factor of one-half (0.50) EDU per dwelling unit, e.g., a parcel with a 100-unit apartment would be assessed 50 EDUs. Based on data from representative cities in Northern California, the multiple family residential factor of fifty (50) percent is determined by the statistical proportion of relative trips generated from various types of residential uses, in combination with density per unit. Benefit Zones 18, 27, and 45 are assessed as 1.0 EDU per dwelling unit for townhomes and condominiums.

**Developed Commercial/Industrial, Recreational, Institutional, and Other Miscellaneous Uses** - Developed commercial and industrial properties include commercial, industrial, recreational, institutional, or miscellaneous uses per Contra Costa County land use codes. The parcels are assessed based upon their acreage. The parcels are assessed one (1.00) EDU for the first acre or any portion thereof, one (1.00) EDU/acre for each additional acre up to a maximum of three (3.00) EDUs. The minimum number of EDUs per parcel is one (1.00) EDU.

Commercial, industrial, recreational, institutional, or miscellaneous uses in Benefit Zone 7, both developed and undeveloped per Contra Costa County land use codes, are assessed based upon the potential floor area ratio of the parcel. The minimum rate per parcel will be one single family unit.

**Undeveloped Single Family Residential** - Parcels defined as undeveloped single-family residential parcels will be assessed at fifty (50) percent of the developed single-family rate or 0.50 EDU's.

**Undeveloped Multiple Family Residential** - The EDUs for land designated as undeveloped multi-family use which includes undeveloped townhomes, condominiums, mobile homes, and apartments are assessed half of the developed EDU factor per planned dwelling unit. For example, a parcel that is planned for a 100-unit apartment complex would be assessed 25 EDUs. If the number of planned dwelling units are not known, then the rate is 0.50 EDUs/acre with a minimum of 0.50 EDUs and a maximum of 1.50 EDUs.

**Undeveloped Non-Single Family Residential** - Parcels defined as undeveloped non-single family residential will be assessed at fifty (50) percent of the developed commercial/industrial rate. These parcels include undeveloped commercial/industrial, recreational, institutional, and other miscellaneous parcels. These parcels will be assessed at 0.50 EDUs per acre or any portion thereof, with a minimum of 0.50 EDU per parcel and a maximum of 1.50 EDUs per parcel (3.00 acres). Incremental acreage greater than 3.00 acres is considered to be open space area and therefore receives no further assessment.

Undeveloped property is described as parcels with no improved structures. Property values increase for undeveloped parcels when public infrastructure improvements are installed and well maintained.

**Exempt** - Exempted from the assessment would be the areas of all public streets, public avenues, public lanes, public roads, public drives, public courts, public alleys, all easements and rights-of-ways, all public parks, cemeteries, greenbelts, and parkways, and all public school property, other public property, designated open space, and public utilities.

**BENEFIT ZONE CLASSIFICATION**

As properties develop throughout the County, they are annexed into the District. A specific Benefit Zone may be created for these properties or they may be included within an existing Benefit Zone, which is unique and distinguishable from other Benefit Zones located within the District. Each Benefit Zone is evaluated to determine which improvements are of a specific and direct benefit to the parcels in that Benefit Zone. Once the improvements have been identified, a method of allocating those costs to the benefiting parcels is developed.

The following is a listing of the various Benefit Zones in the District, their corresponding number of parcels/units in each Benefit Zone, and the method of apportioning the costs of the improvements. Some Benefit Zones include an increase each year as allowed by the assessment formula when the Benefit Zone was formed.

2,567 Parcels

Each of the parcels located in this zone will be assessed an equal share of the total assessment. In order to spread the costs in proportion to the benefit, two subzones developed.

Subzone "A"

Parcels located within Subzone "A" were established with a Maximum Assessment Rate of **\$32.04 per EDU**. As of Fiscal Year 2023-24, parcels located within Subzone "A" are no longer obligated to contribute to the maintenance of Lefty Gomez Park and the Community Center. Therefore, the applied assessment rate has been reduced and has been set to the same rate as Subzone "B", which is **\$27.24 per EDU**.

Subzone "B"

Parcels located within Subzone "B" (View Point Park (Tracts 4326, 4327, 4328, 4329 and 4958) Subdivision) were assessed at eighty-five (85) percent of the Maximum Assessment rate. These subdivisions had a reduced Maximum Assessment Rate because they have access to View Point Park through their homeowner's association. The parcels within Subzone "B" were never obligated to contribute to the maintenance of Lefty Gomez Park because they were not anticipated to place the same demand on the Lefty Gomez Park picnic and play area. Therefore, the assessment rate for parcels in Benefit Subzone "B" was reduced by \$4.80 per EDU and has been set at **\$27.24 per EDU**.

In summary, commencing with Fiscal Year 2022-23 all parcels within Benefit Zone 38 will be subject to the same applied Assessment Rate of \$27.24 per EDU because the County and Benefit Zone 38 have no obligation to maintain Left Gomez Park.

679 single family, 127 townhomes and 120-unit senior housing at build out  
and 3 other parcels

Each of the parcels located within this zone is assessed an equal share of the total assessment. Single family parcels are assessed at 1.00 EDU/parcel, townhomes are assessed at 0.50 EDU/parcel and the senior housing is assessed at 0.50 EDU/unit. It is estimated that at build out of the zone the total amount needed to maintain the public improvements for Zone 69 on an annual basis is \$853,185.90 (Fiscal Year 2006-07 dollars).

$(679 \text{ single family units} * 1.00 \text{ EDU}) + (127 \text{ townhomes} * 0.50) + (120 \text{ senior units} * 0.50) = 802.50 \text{ EDUs}$

$\$853,185.90 \text{ divided by } 802.50 \text{ EDUs} = \$1,063.16/\text{EDU}$

The maximum assessment rate was set in Fiscal Year 2006-07 at \$1,063.16 per EDU with an allowance for a minimum of a 2% or CPI increase (if greater than 2%) each fiscal year which is based upon the San Francisco Bay Area All Urban Consumers as of June 2006 (209.1).

In March 2018, the County Planning Commission approved the change in land use for a proposed multi-family residential development to an industrial business park. As a result, there are two (2) undeveloped properties within the zone that are approved to develop into an industrial business park, rather than the intended multi-family residential use.

On May 8, 2018, the Board of Supervisors approved a General Plan Amendment and the Final Development Plan for this project.

On October 11, 2022, the Board of Supervisors accepted the Notice of Completion for the constructed improvements and accepted the right-of-way dedication.

Each of the parcels within this zone is assessed its share of the total assessment for this zone. Single family parcels are assessed at 1.00 EDU/parcel. It was estimated that at build out of the zone the total amount needed to maintain the public improvements for Zone 74 on an annual basis was \$260,250 (Fiscal Year 2007-08 dollars).

$(173 \text{ single family units} * 1.00 \text{ EDU}) + (2 \text{ undeveloped industrial parcels} * 1.5 \text{ EDU}) = 176.00 \text{ EDUs}$

The maximum assessment rate was set at \$550.00 per EDU with an allowance for a minimum of a two (2) percent or CPI increase (if greater than 2%) each fiscal year which is based upon the San Francisco Bay Area All Urban Consumers as of June 2006 (209.1). The February 2023 CPI Index is 337.17. Therefore, the maximum rate for Fiscal Year 2023-24 increased by 5.30% and is \$890.68 per EDU. The rate has been set at \$340.00 per EDU.

It is estimated that at build out of the Zone the total amount needed to maintain the public improvements for Zone 75 on an annual basis is \$42,525.88 (Fiscal Year 2008-09 dollars).

$(217 \text{ courtyard units} * 0.75 \text{ EDU/unit}) = 162.75 \text{ EDUs}$

$(1 \text{ single family parcel} * 1.00 \text{ EDU/parcel}) = 1.00 \text{ EDU}$

$(0.96 \text{ institutional acres}) = 1.00 \text{ EDU}$

The maximum assessment rate was set at \$254.11 per EDU with an allowance for a minimum of a two (2) percent or CPI increase (if greater than 2%) each fiscal year which is based upon the San Francisco Bay Area All Urban Consumers as of June 2006 (209.1).
