Subject: Tassajara Parks Project questions for public hearing

Follow Up Flag: Follow up
Flag Status: Completed

Dear Mr. Tully and Clerk of the board,

The project raises both policy and environmental issues:

-The Sierra Club strongly opposes this measure. The Urban Limit Line (ULL) is a powerful tool that Contra Costa voters passed as Measure C in 1990 to ensure that new development occurs within certain boundaries, thus protecting the county's remaining agricultural lands and open space from sprawl. Most proposals to build outside the Urban Limit Line would need voter approval. But there is a loophole whereby developments of 30 acres or less can get the go-ahead as long as the County Board of Supervisors can make a "finding" from a list of specified circumstances. Tassajara Parks is being sold to the County as a trimmed-down 30 acres to slip through this loophole (even though the actual building/grading envelope is 54 acres*).

The "finding" that the developer aims to qualify under is a "Preservation Agreement." The great irony is that the area in question doesn't need further preservation as **it is already preserved by the county's General Plan**, zoning ordinances, and the Urban Limit Line — layers of protections that would be seriously eroded by approval of Tassajara Parks.

After reading the impact report, it is very clear that the proposed "125 Single Family Homes" to be built next to Tassajara Hills Elementary School will significantly impact the traffic on Camino Tassajara Road and over crowd our schools, specially the middle school and High Schools will significantly exceed their capacity. The Zoning for open space and non residential has been in place for many years and has kept this area relatively clear of excessive traffic even though our schools have already become over crowded with the current population. The table referred to in the impact report is from 2015.

There are hundreds of member of our community who are very concerned about this project and voiced their opposition to it during the last announcement regarding this project. We see this attempt by a large land owners to changed established ULL and to push their over development agenda in our community for expensive housing to make millions of dollars in profits. They have falsely called their project "Tassajara Parks Project" when in reality it is a massive multi-million dollar housing development. There is very little to no benefit to their proposal pertaining to our community. Danville's population has not changed much in the past 20 years but it has been shifting to more families with both parents working with school age children and our infrastructure is not equipped to handle hundreds of more families added on a single access road and handful of schools. There are plenty of existing affordable residential housing available in our community to any interested families without risking over crowding our streets and schools.

-The city of Danville has issued a formal opposition this project which the presents "inconsistency with growth management principles built into Measure J (i.e. focusing housing and jobs around transit centers and downtowns)." In addition to being inconsistent with the Danville 2030 General Plan, the project presents

potentially significant environmental impacts, growth inducing impacts and has a lack of any viable water service provider. If Contra Costa County can make these exceptions to the ULL, people are going to stop trusting in the system. According to the project impact report, this Project would generate new trips that would contribute to unacceptable traffic operations. This project will bring NO benefit to Danville and its residents.

1-Why would the county make unilateral exception to the ULL without voter approval on a project that offers NO Real benefit to the residence of Danville or the Environment in the area? (to call this a 30 acres project is completely false. This is truly a 54 acres project requiring voter approval)

2- How does the developer plan to address the concerns raised above regarding traffic, over crowding of the schools, and water impacts ? We are in a significant drought. Where is the extra water going to come from? How would developer address the overcrowding of our schools as predicted by the impact report? How would the developer address the increase traffic on Camino Tassajara road?

I look forward to hearing the response during the public hearing from the developers and the Contra Costa County officials.

Regards,

Sam Pejham, M.D., FAAP

*Though proposed as a 30-acre exception to the voter approved ULL, the referenced 30-acre area includes only the residential lots and public streets. The FEIR indicates that the development includes an additional 19.3 acres of grading along with a 2.95-acre detention basin, and 1.44 acres of equestrian and pedestrian staging areas for a total development area of approximately 54 acres. The County staff report refers to the additional 24 acres as "non-urban developed area," a term which is not defined anywhere in the County general plan or zoning ordinance.

Subject: Public Comment for 7/13 meeting: Tassajara Parks Project

Dear Board of Supervisors,

I am writing to ask that you oppose the Tassajara Parks Project.

Normally I am very much in favor of new housing, but this project eliminates open space, will create long commutes, and will worsen green house gas emissions. I believe our priorities need to be creating new housing within our cities, not moving urban limit lines to create more housing on the outskirts. Please oppose the project.

Thank you,
Daniel Schulman

Subject: [BULK] KEEP Urban limit line

Please do not vote to move the urban limit line. There are so many reasons to keep the line where it is - well water disturbance, sewage issues, traffic congestion, ecological disturbances, animal displacement, and quite frankly disturbance of all the reasons I put my life savings into choosing to live in my little bit of countryside.

Subject: VOTE ON THE TASSAJARA PARKS HOUSING DEVELOPMENT

Dear CCC Board of Supervisors,

I am writing regarding the hearing scheduled for July 13, 2021, for the VOTE ON THE TASSAJARA PARKS HOUSING DEVELOPMENT.

I live nearby in the Alamo Creek neighborhood. Alamo Creek was the last neighborhood to be built east of Crow Canyon, off Camino Tassajara Rd., WITHIN the ULL. I am TOTALLY against the proposed development for the Tassajara Parks Project. I know this will only be the beginning of further housing developments along Tassajara Rd., heading to Dublin, as building OVER the ULL, which was created for a reason, will set a new precedent for further housing developments. This will have myriad negative impacts on me as a local resident.

I will not vote for my county supervisor in her next election, Diane Burgis, if she votes in favor of this proposal.

Thank you,
Laura Vranas

Dear CCC Board of Supervisors, I am writing regarding the hearing scheduled for July 13, 2021, for the VOTE ON THE TASSAJARA PARKS HOUSING DEVELOPMENT. I live nearby in the Tassajara Ridge neighborhood. We moved in recently into the neighborhood from Newark, CA and picked Danville even over San Ramon so that we could live in a neighborhood and town that was not packed like a can of sardines and where the school system was not overwhelmed by enrollments. I am TOTALLY against the proposed development for the Tassajara Parks Project. I know this will only be the beginning of further housing developments along Tassajara Rd., heading to Dublin, as building OVER the ULL, which was created for a reason, will set a new precedent for further housing developments. Contra Costa County Board of Supervisors ,

Hello,

I strongly urge you to reject the Tassajara Parks development proposal. Urban boundaries were created for a reason; we need to protect our open spaces and focus growth inside the city limits. An amendment to the General Plan to allow development beyond city lines would have severe environmental and safety implications for generations to come.

Protecting the Urban Limit Line is a critical way to maintain fire boundaries and reduce our greenhouse gas emissions. In December 2016 the Board of Supervisors approved the Urban Limit Line in their Mid-Term review, which stated that the ULL analysis demonstrates that sufficient capacity exists countywide inside the ULL to accommodate housing and growth through 2036. Contra Costa County has space to grow in a climate-smart way. Do not move the ULL, thereby risking the health of our communities and the resilience of our region.

Thank you!

Subject: I am AGAINST the Tassajara Parks Housing Development

Dear CCC Board of Supervisors, I am writing regarding the hearing scheduled for July 13, 2021, for the VOTE ON THE TASSAJARA PARKS HOUSING DEVELOPMENT. I am TOTALLY against the proposed development for the Tassajara Parks Project.

I live nearby in the Vista Tassajara neighborhood. I fell in love with the small town feel and the vast open spaces and rolling hills. I moved here in 2004 and I plan to retire here soon. My children attended Tassajara Hills Elementary, DV Middle School and Monte Vista High School. I enjoyed the peacefulness of the adjacent communities. Windmere was just beginning to develop, then Alamo Creek started to develop next door and soon adjacent counties at the border of Alameda County towards Santa Rita Road and Dublin Fallen Road took the cozy country feeling away. I understand we need more homes but I DO NOT WANT IT IN MY BACKYARD! Have you driven on Caminio Tassajara in the morning? With the above addition of these communities it has become a parking lot. I understand if these areas were previously zoned for homes but as I read this TASSAJARA PARKS HOUSING DEVELOPMENT is asking to change the URBAN LIMIT LINE to develop this community. ABSOLUTELY NOT! PLEASE VOTE AGAINST THIS MODIFICATION TO OUR OPEN SPACE.

Danville, CA has a small town feel and the BEST place to live. Please keep it from further development. Do not change the Urban Limit Line. Please vote NO! Do not set a precedent for further housing developments in our area.

Thank you, Richard and Diana Kim

Contra Costa County Board of Supervisors ,

Hello,

We need housing AND we need open space. We can have both, as long there are thoughtful and consistent policies in place. Allowing development outside the established urban limit lines clearly is inconsistent--and against the will of the voters who wanted those lines in place. While the built environment can be re-jiggered for new uses, open space is hugely harder and takes decades longer to restore once it's been taken over--and that's if there's a strong political will to do so. In other words, do not go there with this Tassajara Parks development proposal.

Please, work instead with the developers to help them put together housing WITHIN the urban limits.

I strongly urge you to reject the Tassajara Parks development proposal. Urban boundaries were created for a reason; we need to protect our open spaces and focus growth inside the city limits. In addition, during this obvious global warming, constant drought in this state, this is beyond ridiculous. Unless the developers have figure out how to "manufacture water", it is inconceivable that CCC would strain our already depleted water tables. AND the infrastructure throughout this county should also be obvious and factored in to ANY new developments ANYWHERE in this county

PLEASE DO NOT allow this area to be impacted in this manner.

Thank you!

Contra Costa BOS ,

As a resident of the San Ramon Valley, I am writing to you today to urge you to approve the Tassajara Parks Project. This project will provide significant benefits for my community. Over 727 acres will be given to the Park District permanently protecting that acreage from development. It dedicates seven acres to a potential fire facility training center. It will provide the County \$6.5 million in funds dedicated to agricultural enhancements among other uses.

It will also be built under a Project Labor Agreement, which will result in good middle-class jobs for local residents and an opportunity for apprentices to learn their trade.

Please join with labor, environmental, and agricultural advocates in supporting this important project.

Dear Contra Costa County Board of Supervisors:

I ask that you reject the proposed Tassajara Parks development project because

- 1) it is illegal,
- 2) there is no approved water source,
- 3) there is overwhelming local opposition and
- 4) it is inconsistent with the county's previous findings that sufficient housing capacity exists inside the ULL.

The carefully considered recommendation of the Planning Commission rejecting Tassajara Parks should be respected. The proper methodology for approval of a project in excess of 30 acres is submission to the voters of the county.

Thank you for your consideration,

7/12/21 Contra Costa County Board of Supervisors Public Hearing Tassajara Parks Project

Dear Supervisors

My name is Jeff Wiedemann. I live at 6989 Highland Road, Tassajara CA. I own and manage a 160 year old farming and ranching operation in Contra Costa County. I am against the destructive and dishonest use of the term "protecting agriculture" as a ploy to approve a housing project. You should remove all reference to agriculture and replace it with the truth which is: CONTROLLING OPEN SPACE AT NO COST TO THE VOTERS ON THE BACKS OF AGRICULTURAL PROPERTY OWNERS.

The Tassajara Parks Project and its illogically named AGREEMENT ^[1]REGARDING PRESERVATION AND AGRICULTURAL ENHANCEMENT IN THE TASSAJARA VALLEY is one of the worst examples of property rights confiscation I have ever seen. To add insult to injury, our County has cheerfully joined with San Ramon, EBRPD and the environmental community in stuffing their pockets with developer dollars and have, again, acquiesced to the policies of the sue-happy environmentalists.

And, once again, this farce of an approval process has those same characters dressed in rural garb waving banners reading "Power to Agricultural Preservation and Enhancement", "Save Tassajara Farms" and on and on ad nauseam.

In reality, who cares that the world population is marching toward 9 billion as agricultural resources (water, land, etc.) continue to shrink. Isn't agriculture the boogeyman that is polluting the earth, poisoning the masses and abusing innocent animals? Well, so who cares?

Here's the little secret: It's a distraction. Much can be accomplished while the electorate is being told that this project is about motherhood, apple pie and preserving and enhancing 17,000 acres of ag lands. While the left hand is busy promoting that storyline, the right hand slathers another layer of mindless restrictions on the use of the land. The effect is to further stifle agriculture, not in any way to enhance it.

The County and Developer's only recommendation for " PRESERVATION AND AGRICULTURAL ENHANCEMENT " is to force "willing sellers" (read, Desperate Landowners with no options) into partnering with often misguided and ill-informed easement holders or, more likely, to sell their land to a public agency thus becoming subservient tenant farmers. When was the last time we saw subservient tenant farmers be more productive than modern agriculture? How about never.

On a related subject, I attended, with many others, almost 18 months of CONTRA COSTA COUNTY AGRICULTURAL LAND USE POLICY REVIEW meetings culminating in a hearing with the BOS in February of last year. At first, it seemed that something positive might come out of it.

In retrospect, it was a huge slap in the face of agriculture. Recommendations from the Land Use Policy Review meetings are not addressed in the County's General Plan update, regulations regarding agritourism are tightened, significant opportunities are denied, there is no real effort to establish an Ag Advisory Committee to work out issues. The clearest recommendation to the Board by staff was to have the property owners sell their development rights to non-agricultural entities. Do we see a pattern here?

I'm not a religious person but I like this quote: Whoever is faithful in small matters will be faithful in large ones; whoever is dishonest in small matters will be dishonest in large ones.-- Luke 16:10

It's not the project that stinks; it's the dishonesty. I'd encourage you, the Supervisors, to try being honest. Remove the ridiculous and damaging language about "Enhancing Agriculture" and get real.

Jeff

Contra Costa County Board of Supervisors ,

Hello,

I strongly urge you to reject the Tassajara Parks development proposal. Urban boundaries were created for a reason; we need to protect our open spaces and focus growth inside the city limits. An amendment to the General Plan to allow development beyond city lines would have severe environmental and safety implications for generations to come.

Protecting the Urban Limit Line is a critical way to maintain fire boundaries and reduce our greenhouse gas emissions. In December 2016 the Board of Supervisors approved the Urban Limit Line in their Mid-Term review, which stated that the ULL analysis demonstrates that sufficient capacity exists countywide inside the ULL to accommodate housing and growth through 2036. Contra Costa County has space to grow in a climate-smart way. Do not move the ULL, thereby risking the health of our communities and the resilience of our region.

Thank you!

It's surprising, since we're being lobbied to increase infill housing in cities, to see governments still supporting sprawl. Get your eggs in one basket, folks.

Thank you!

Contra Costa County Board of Supervisor

Please reject the Tassajara Parks development proposal. Urban boundaries were created in order to protect our open spaces and to focus growth inside the city limits. An amendment to the General Plan to allow development beyond city lines would have severe environmental and safety effects for future generations.

Protecting the Urban Limit Line satisfies a critical need to maintain fire boundaries and to reduce our greenhouse gas emissions. In December 2016 the Board of Supervisors approved the Urban Limit Line in their Mid-Term review, which stated that the ULL analysis demonstrates that sufficient capacity exists countywide inside the ULL to accommodate housing and growth through 2036. Contra Costa County has space to grow in a climate-smart way. You should maintain the current ULL in order to protect the health of our communities and the resilience of our region. Every acre of land devoted to open space provides us with cleaner air, protects the natural web of life with its subtle dependencies, thus benefiting the people of our area and protecting our only planet.

Thank you for your careful consideration of these comments.

Subject: 7/13 Public Comment Tassajara - we need urban infill, not sprawl

Contra Costa County Board of Supervisors ,

Hello,

I strongly urge you to reject the Tassajara Parks development proposal.

According to the climate scientists at UC Berkeley & UC Davis, "urban infill" is one of the most effective local policy tools that Contra Costa County can implement to reduce greenhouse gas emissions. This means higher levels of density, closer to existing transit and services. The Tassajara Parks development proposal is contrary to this climate science and encroaches into important open space. Details available at <https://coolclimate.berkeley.edu/ca-scenarios/index.html>.

Thank you!

Dear Clerk of the Board;

Please find the Tassajara Valley Preservation's Association comments on the proposed Tassajara Parks proposed development for inclusion at the BOS July 13th meeting. Along with the TVPA comments are 1, comments from our petition signers and 2, a listing of the over 5000 petition signers who request the BOS to reject Tassajara Parks. Please note that many of the "Pleasanton" signers reside in the unincorporated Tassajara Valley and would be directly impacted by the Tassajara Parks development.

Also, it would be helpful to know the approximate time when item D4, the Tassajara Parks item will be discussed.

Thank you for your attention to this matter.

Kind regards,

Richard Fischer

Re: 7/13/21 Board of Supervisors Hearing to consider the Tassajara Parks Project

Dear Contra Costa County Board of Supervisors:

The Tassajara Valley Preservation Association along with over 5,000 petition signers requests that you reject the proposed Tassajara Parks development project because:

- **It is illegal and a violation of the County's Measure L**
- **The project does not have a source of water**
- **Conservation and Development staff report is inconsistent with its previous findings and statements regarding developable land within the Urban Limit Line ("ULL")**
- **The Planning Commission has rejected Staff's report and has recommend to the Board of Supervisors to deny this project**

IT IS ILLEGAL AND A VIOLATION OF THE COUNTY'S MEASURE L

A. Measure L requires that any development outside the Urban Limit Line ("ULL") over 30 acres requires a county-wide vote:

a. Staff report clearly indicates that the Northern Site contains 24 acres of so called "Non-Urban" use. Included in this area is a pumping station and a detention basin that is integral to the 30 acre "Residential Development Area". This infrastructure is necessary for the proposed development and is clearly not "non-urban". When this area is properly included, the development is closer to 54 acres in size and requires a county-wide vote. It is not a 30 acre development and does not qualify for an exemption to build outside the ULL..

b. An analogy may help. A batter in baseball cannot change the rules mid-game and ask the umpire to not count the first two strikes. Similarly a developer cannot choose to circumvent the 30 acre limitation by deciding not to count certain portions of the development.

B. The "Preservation Agreement" used to secure approval is flawed, illegal and non-enforceable:

a. The nearest city to the development site is Danville which has registered its opposition to the project and is illegally excluded from the Preservation Agreement. Danville will bear the brunt of traffic exiting the development and will be a strain on its services. It is the only city in the county on Camino Tassajara that will experience traffic from the development.

b. A Preservation Agreement must be signed by a majority of the cities and the county to be valid. Note that the wording is not a majority of the cities and the county taken as a whole. The county carefully chose the wording in Measure L and the plain English meaning of this wording is that the county's approval must be secured before an agreement is valid. It also means that a majority of the cities approval must be obtained. Danville and San Ramon are the nearest cities, and with Danville excluded from the agreement, a majority of the cities cannot be obtained. Hence the proposed agreement is invalid and therefore a condition to allow a 30 acre development outside the ULL is not satisfied.

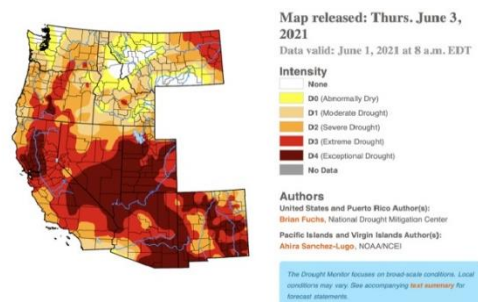

c. The agreement is flawed and is only proposed because it **alleges to fit** one of seven acceptable exceptions for a development outside the ULL. The agreement is not an enforceable contract among the County, San Ramon and East Bay Parks District. Any party can withdraw from the agreement at any time without any penalty. The county does not give up its right to change the zoning in the Preservation Area at any time. The developer misleads by implying that this agreement provides any more protection than the current ULL. County Counsel will affirm that the agreement may be terminated at any time by any party without penalty and is non-enforceable. In effect, it is no agreement at all.

C. If Tassajara Parks is approved, the above reasons advanced will be the basis of a suit filed against the parties as a violation of County law, specifically Measure L. This will expose the County to unnecessary litigation costs, damages and penalties, a clear waste of taxpayer money.

THERE IS NO SOURCE OF WATER FOR TASSAJARA PARKS

A. The East Bay Municipal Utility District has rejected supplying water to Tassajara Parks and the EIR needs to be redone to reflect a water source. EBMUD has reiterated their objections numerous times as:

- a. TP is outside their service area and ultimate service boundary.
- b. The developer's estimate of water usage has been under estimated by a factor of 2
- c. Seventy two percent of California is experiencing a drought condition and the utility must insure that existing customers within its service area is assured an adequate supply of water:
 - i. Governor Newsom has declared a drought emergency in 41 of 48 California Counties imposing water conservation restrictions.
 - ii. Water runoff from snowpack since April 1st is near zero due to parched earth.
 - iii. California reservoirs hold 50% less than normal at this time of the year per Centers for Watershed Sciences at UC Davis. Oroville dam pictured below:

THE COUNTY'S STAFF REPORT IS INCONSISTENT WITH ITS PREVIOUS FINDINGS AND STATEMENTS

A. The proposed development is in stark conflict with the County's own 2016 ULL Mid-term Review that concluded "Sufficient capacity exists countywide inside the ULL to accommodate housing and job growth through 2036".

B. Why is this development moving through the approval process?

a. San Ramon is proposing 4,000 housing units to be built in Bishop Ranch proving there is enough buildable capacity within the ULL. Thus there is no need to go outside the ULL.

b. Is it the \$ 6.5 million offered by the developer to the county to fund the so-called Agricultural Enhancement uses? Does the payment of these 30 pieces of silver justify the betrayal of the residents of this county who rely on the fair enforcement of laws governing the ULL?

THE PLANNING COMMISSION MET ON JUNE 9, 2021 AND BY A DECISIVE VOTE OF 4-2 REJECTED STAFF'S REPORT CITING SOME OF THE FOLLOWING:

- A. Lack of a water supply. LAFCO has stated that they will oppose annexation without a "will serve" letter from EBMUD.
- B. The opposition of the Town of Danville, the nearest city to the development.
- C. The conclusion that the "Preservation Agreement" provides no additional protection from development and can be abandoned or ignored by any party at any time.
- D. The impact to traffic congestion on Camino Tassajara as they found that projected automobile usage was significantly understated in Staff's report.
- E. The overwhelming local opposition to this project.

SUMMARY

The proposed project should be rejected because 1), it is illegal, 2) there is no approved water source, 3), overwhelming local opposition and 4), it is inconsistent with the county's previous findings that sufficient housing capacity exists inside the ULL. The carefully considered recommendation of the Planning Commission rejecting Tassajara Parks should be respected. The proper methodology for approval of a project in excess of 30 acres is submission to the voters of the county.

Thank you for your dedication to serving the residents of Contra Costa County.

Respectfully,

Richard L. Fischer

Subject: 7/13 Public Comment Tassajara

Contra Costa County Board of Supervisors ,

Hello,

I strongly urge you to reject the Tassajara Parks development proposal. Urban boundaries were created for a reason; we need to protect our open spaces and focus growth inside the city limits. An amendment to the General Plan to allow development beyond city lines would have severe environmental and safety implications for generations to come.

Protecting the Urban Limit Line is a critical way to maintain fire boundaries and reduce our greenhouse gas emissions. In December 2016 the Board of Supervisors approved the Urban Limit Line in their Mid-Term review, which stated that the ULL analysis demonstrates that sufficient capacity exists countywide inside the ULL to accommodate housing and growth through 2036. Contra Costa County has space to grow in a climate-smart way. Do not move the ULL, thereby risking the health of our communities and the resilience of our region.

Thank you!

Fiorella Russo-Jang

Subject: Tassajara Parks Project

Clerk of the Board of Supervisors:

I encourage the Board of Supervisors, our elected officials, to deny revising the urban limit so the developer of Tassajara Parks Project can benefit. The Urban Limit line was established to benefit the community as a whole and not one builder. Why set a limit if it is ignored? This should be a simple decision. Please deny the project and preserve our open space.

Thank you,

Glen Simmons

Dear Contra Costa County Board of Supervisors,

7/10/21

My wife and I are residents in a neighborhood close to the Tassajara Elementary School. For the past 30 years of living in this quiet neighborhood, we have witnessed housing development after development turning the early two lane Tassajara dirt road into a busy thoroughfare for motorists going to Dublin, and Livermore resident's taking shortcuts in order to avoid the 580 freeway by simply taking Tassajara to Highland Rd.

Camino Tassajara has also become a favorite weekend destination for bikers. We have two schools now in the area and residents have to deal with morning and after school traffic. Our point is with further home construction along this stretch of Tassajara there will be more traffic lights to impede us from getting us to our East Bay cities.

Bringing in more residents to this area will create more congestion, air pollution, unduly burden our school and water systems. These "developers" will not have to endure the increased air pollution, traffic, and increased stress on our precious water reserves. This green space area was intentionally drawn up not to be developed.

Can you imagine the inconvenience residents will have to go through during years long of home construction and roads? The quality of life for all our county residents need not be jeopardized by ruining this pristine area.

For these reasons we object to the proposed "Tassajara Park Project" and appreciate your consideration in this matter.

Bernie and Jennifer Gorman

Subject: Objection to Tassajara Parks Housing Development

Board of Supervisors:

There is a purpose we voted for county Measure L (Urba Limit Line). The Tassajara Parks Housing Development does not accomplish what the people voted for. In fact, it does just the opposite and increases urban sprawl.

Camino Tassajara Road is already congested with traffic during commute hours.

As Contra County Residents since 2001, we strongly urge you to vote against the Tassajara Parks Housing Development.

To: Clerk of the Board
Subject: Comment on July 12 CCC Board of Sups meeting agenda item D4

Dear Clerk of the Board and Board Members,

I request a no vote for the D4 Tassajara Parks Valley Project.

1. In 1990 CCC voters approved the Urban Limit Line which limits urban development to certain areas of the County and helps to preserve farmland and open space.
2. CCC doubled-down on the CLL once again in 2006 when voters passed measure L. This extended the 65/35 designation.
3. Other property is available within in the CCL.
4. The CCC Planning Commission rejected the project.
5. EBMUD stated they will not furnish water to this project
6. CCC has supported efforts to reduce GHGs and encouraged housing development near transportation hubs
7. CCC has supported building more multifamily housing to reduce sprawl and people driving longer distances.
8. Bay area regional planning groups are asking us to support smart growth, which this is not.
9. This project is not align with the County's goal of racial justice and equality.

Thank you,

Jan Warren

Subject: Tassajara Parks Project 7/13/2021 Board of Supervisors Meeting

Dear Board of Supervisors:

Please allow me to voice our opposition to the Tassajara Parks Project.

We have lived inside the Urban Limit Line, just adjacent to the beautiful Tassajara valley area, for almost 25 years. We have endured the extensive housing developments permitted to be constructed, the commuter traffic along two-lane Camino Tassajara through our rural horse properties, the tragic loss of our wildlife from careless drivers, the loss of rural habitat and our historic agricultural lands. We moved here because this was an area of countryside, respect for the land and the animals that occupied it, of the landscape, trees, and agricultural development that could co-exist. When the Urban Limit Line was established several years ago as a result of considerable efforts on the part of properties owners and existing neighborhoods alike, the area breathed a sigh of relief. Finally there seemed to be a limit to the ever-expanding stucco buildings, the increasing people, the increasing cars, and the damage to our rural environment.

But now, the Urban Limit Line is "inconvenient", doesn't bring in money, doesn't provide tax dollars and services and jobs and parking and roadways --- so it needs to be altered in some form to suit current standards and those individuals that can benefit from the changes. That is a slap in the face to those of us who fought so hard for the right to preserve the rural area and the properties that represent a form of dwindling nature and wildlife habitats. We believed our local governments when they said nothing would ever be built beyond the Urban Limit Line. The fact is there are opportunities for housing construction within existing city and county boundaries that do not require access to the rural countryside. These areas already have water, have roads and schools and services. We don't need to further damage the limited open lands that we do have in our area to satisfy a developer and apparently a property owner that wish to capitalize on house sales. How tragic and short-sighted. And trading development for the promise that other open spaces won't ever be developed? That's more like extortion than a deal.

Once developments of this caliber are created and sold, the builders move on ---- leaving the rest of us to deal with traffic on two-lane Camino Tassajara that has become more like a highway than a rural property road. No provisions are made to route traffic through already-developed roads. And the result is what has prompted me to write today: A beautiful doe with young twins was hit and killed today just across from where we keep our horses. We've been watching her and her babies for a few weeks. They're still nursing, looking for water these days, and unfortunately she didn't make it across the road. And now there are three dead because fawns at this age don't survive without the mother. All because someone had to go faster than warranted. It's heartbreaking and anger-inducing all at the same time. And that doesn't even remotely address the idiots that honk when we're braking to turn into the barn driveway. And you want more of these people and their cars driving Tassajara each day? With their arrogance and sense of entitlement? With the County making no provisions for alternative roads through our rural properties? We feel as though no one cares about our difficulties, let alone is listening to us.

We have invested our time and our money and our lives in improving this area. There is a reason the Urban Limit Line, as the name implies, was put into place. Preserving an area that is unspoiled is a priority in a rapidly-developing urbanization. Projects like Tassajara Parks is an insult to those of us already living in and working to sustain the Tassajara region --- particularly when our own governing bodies challenge boundaries previously and legitimately established.

Think about the dead deer body we've had to pull off the road (the driver didn't stop of course) and remember that's what those of us that live in the area shoulder as a responsibility. Don't add to our burden by approving an ugly, unnecessary high-density housing project outside the Urban Limit Line.

Thank you for listening to our concerns.

Cordially,
Julie and Ray Dormandy

Contra Costa County Board of Supervisors ,

Hello,

I strongly urge you to reject the Tassajara Parks development proposal. Urban boundaries were created for a reason; we need to protect our open spaces and focus growth inside the city limits. An amendment to the General Plan to allow development beyond city lines would have severe environmental and safety implications for generations to come.

Protecting the Urban Limit Line is a critical way to maintain fire boundaries and reduce our greenhouse gas emissions. In December 2016 the Board of Supervisors approved the Urban Limit Line in their Mid-Term review, which stated that the ULL analysis demonstrates that sufficient capacity exists countywide inside the ULL to accommodate housing and growth through 2036. Contra Costa County has space to grow in a climate-smart way. Do not move the ULL, thereby risking the health of our communities and the resilience of our region.

Thank you!

Subject: Comments for the CCC Board of Supervisor re: Tassajara Parks Project

Contra Costa County Board of Supervisors:

I am a 30-year resident of Blackhawk and live on Kingswood Drive on the east side of Blackhawk, on the Urban Limit Line just north of the proposed project. It has been a number of years since the proposal was first submitted, and each time it has been met with opposition. My own comments oppose approval of the Tassajara Parks Project.

As our CCC Supervisors, you are charged with ensuring that our lands are developed when appropriate and protected when appropriate. You are also directed to support the legal and voted-in measures of the county's residents. That being said, you are also charged with protecting the Urban Limit Line that was voted by and approved by the residents with Measure L. It can only be changed with another voter approval, and this has not been done. How can you simply ignore the law, which was voted-in by the residents who are assuming that their Supervisors operate under the law? This project blatantly sits outside the ULL. Is the Board still contemplating giving approval to it, breaking the trust of the County residents and allowing a developer to build unlawfully outside the ULL? I certainly hope not, in light of growing opposition to the Park development and increasing evidence that it is not in the County's best interests or legal.

It has recently also been made known that EBMUD will not provide water to this development - it is somewhat shocking that the people planning this project did not investigate this beforehand, obtaining the water for the 125 homes from a source. And, we are once again in a drought, not the first time and not the last. Were they hoping the water would suddenly be given to them, that EBMUD could take it from other sources, or that they could get approval from you now, and hope that there would be pressure to give them adequate water resources afterward? This is not the way to do business, to build homes, and I doubt that this is the normal process. Is this developer entitled in some way, for the project to proceed this far without having the very basic requirement - water - committed?

I am aware that many residents in nearby communities and commuters are concerned about increasing traffic, pollution and congestion and other environmental hazards that will result from this development. There is also the fact that resources such as fire and police protection will have to be provided by nearby cities such as Danville and San Ramon and stretch their own resources, if they are available at all.

In addition, giving approval to remove "up to 19 code-protected trees" is excessive. This may appear a minor point when I am against giving approval for the entire project. However, I want to mention this because it should not be even considered when development wants us to destroy trees that should have a natural right to survive and not be removed simply for the location of a housing development.

I would like to believe that our County Supervisors have studied all the information and have come to the conclusion that this project is not appropriate, is not legal, and does not have essential water to exist. It does not make sense to approve it, it is that plain, it is that simple.

Respectfully submitted written testimony before the July 13, 2021 CCC BOS meeting,

Jule Smith

Your opposition is very much up to the point as you have studied the project better than us. Anyway, glad you notified us so we can submit an opposition to the project too. Hopefully this project will be denied.

Thanks Jule for keeping us informed.

Re: Tassajara Parks Project, Unincorporated Contra Costa County
July 13, 2021 County Board of Supervisors Hearing

Dear Ms. Nino:

Pursuant to the June 29, 2021 Notice of Public Hearing, we are writing on behalf of East Bay Municipal Utility District (EBMUD or the District) to provide comments on the Tassajara Parks Project.

EBMUD incorporates here by this reference the comments made in the following documents, which we request that you download from this link (https://bcltlaw.sharefile.com/d-s975434b8723241c4988485d9192e6634)1 and include in the record for this Project:

- 11-21-16 EBMUD comment letter re: Tassajara Parks Project;
• 9-29-20 EBMUD comment letter re: Tassajara Parks Project;
• 4-27-21 EBMUD Board Resolution No. 35222-21 re: drought;
• 5-27-21 EBMUD comment letter re: Tassajara Parks Project;
• 5-27-21 Barg Coffin comment letter re: Tassajara Parks Project; and
• 6-8-21 EBMUD Board Resolution No. 35229-21 re: Tassajara Parks Project.

In addition, EBMUD has the following comments on the following quoted portions of County staff's Agenda Memo for the referenced agenda item (http://64.166.146.245/agenda_publish.cfm?id=&mt=ALL&get_month=7&get_year=2021&dsp=agm&seq=46220&rev=0&ag=1786&ln=93688&nseq=&nrev=&pseq=46178&prev=0):

1 If you have any difficulty downloading these documents, please let me know.

Monica Nino
July 12, 2021
Page 2

- 1. Agenda Memo: “Staff’s added COAs do not constitute a new or modified project mitigation, but reinforce what is stated in the EIR—that implementation of offsite water conservation measures to offset the project’s water demand will be done in consultation with and approved by EBMUD.”

EBMUD Comment: The above-linked “6-8-21 EBMUD Board Resolution No. 35229-21 re: Tassajara Parks Project” states:

“The Board hereby finds and declares the District ... does not have adequate water supplies to support the proposed annexation of the Project into the District’s service area.

“The Board hereby finds and declares the District must reserve all sources of water supply available to mitigate water supply deficiencies it experiences during droughts and to address the potential impacts of other stressors and constraints on its water supplies.

“The Board hereby finds and declares that serving the Project using water created through implementation of conservation programs throughout the District’s service area is not feasible because doing so would take a source of water supply away from existing and future customers within the [Ultimate Service Boundary] USB, thereby exacerbating deficiencies in the District’s water supplies during droughts. ...

“The Board hereby declares the District (a) is opposed to annexing the Project into its service area and (b) does not intend to serve the Project.”

Therefore, the statement the Agenda Memo attributes to the EIR (“that implementation of offsite water conservation measures to offset the project’s water demand will be done in consultation with and approved by EBMUD”) is wrong. This is important because (a) it means the Project needs another source of water, (b) that source has not been identified in the EIR’s Project Description, and (c) the environmental impacts of developing and using that source have not been addressed in the EIR.

- 2. Agenda Memo: “The Growth Management Element of the County General Plan requires that new developments demonstrate that fundamental utilities and services can be provided to support the proposed project. The [Water Supply Evaluation] WSE indicates there is sufficient water available to meet Project demands during normal, single dry, and multiple dry water years.”

EBMUD Comment: There have been significant developments since the referenced WSE was issued in 2016. On April 27, 2021, EBMUD’s Board adopted the above-linked “4-27-21 EBMUD Board Resolution No. 35222-21,” declaring a Stage 1 Drought. In light of the EBMUD Board’s June 8, 2021 Resolution, it is evident that there is not sufficient water available to meet Project demands because EBMUD does not intend to

Monica Nino
 July 12, 2021
 Page 3

supply water to the Project. Therefore, approval of the Project would be inconsistent with the General Plan requirement – as stated in the Agenda Memo – “that new developments demonstrate that fundamental utilities and services can be provided to support the proposed project.”

3. Agenda Memo: “The County also has conditioned the Project on requiring specified water conserving features and limits on total demand to be included as enforceable provisions in the Project’s CC&Rs, and that penalties could be levied against individual homeowners for violating these provisions, to help ensure compliance. This is consistent with the method successfully used in the Alamo Creek development.”

EBMUD Comment: This Project is different from the Alamo Creek project in two important respects. First, the intervening years (between the Alamo Creek approval and now) have demonstrated the deficiency of EBMUD’s water supplies to meet the demands of current and future customers within its USB, especially during droughts. Second, the Alamo Creek project was not approved in the face of an EBMUD Board Resolution declaring the District’s intent not to supply water for the project.

4. Agenda Memo: “Annexation to [EBMUD’s service area] would require that an application be submitted to LAFCO, which in this case will likely be in the form of a petition executed by the landowners of the project site. LAFCO boundary change processing procedures indicate that in the event annexation into the territory of a special district is not filed by the district, a copy of the proposal is provided to that district, the proposal is placed on a LAFCO meeting agenda for "information purposes", and then a 60-day waiting period is observed before the proposal is placed on the LAFCO Commission's agenda for action.”

EBMUD Comment: This omits an important point made by the LAFCO Executive Officer, Lou Ann Texeira, at the June 9, 2021 Planning Commission hearing on the Project. She said the LAFCO will not accept an application as complete unless it includes a “will serve” commitment from EBMUD. EBMUD not only has not made that commitment, but, as noted above, its Board adopted a June 8, 2021 Resolution stating, “The Board hereby declares the District (a) is opposed to annexing the Project into its service area and (b) does not intend to serve the Project.

5. Agenda Memo: “Utilities: Agencies such as the SRVFPD, Contra Costa County Sheriff, SRVUSD, EBMUD, and CCCSD were consulted, and these agencies have provided information and guidance as to the procedures and improvements required as part of the project to ensure their services can be provided to the Project.”

EBMUD Comment: The consultation with EBMUD cannot reasonably be interpreted as having “ensured” that its “services can be provided to the Project.” To the contrary, as noted above, EBMUD has made clear that it “does not intend to serve the Project.”

Monica Nino
July 12, 2021
Page 4

In sum, the Project needs to find a new source of water to satisfy General Plan requirements, and the EIR must be (a) revised to reflect the new source and its impacts and (b) recirculated.

Thank you for your consideration.

Very truly yours,

Brian S. Haughton

Subject: Tassajara Parks Hearing

I'm writing to express my opposition to the proposed Tassajara Parks High Density Parks project. Not only is this project in direct opposition to what the voters put in place to protect our open space, but high density housing seems to be the norm these days and does nothing to improve the way of life in this area. I saw nothing in the proposal regarding consideration of how we can continue to sustain increased growth when we don't have enough water for everyone. What about the infrastructure....power,roads,schools? In addition, this will not be affordable housing in spite of the very few units that will be set aside to meet some standard that truly isn't affordable for most.

My perception is we open this door and this area will become an unsustainable housing nightmare with the only winners being the developers who walk away and whoever is getting their pockets lined.

Truly.....who benefits from opening this door? Is it just about \$\$\$\$?

Please consider the long term ramifications of this vote.

Regards,

Melanie Firpo
