BACKGROUND: (CONT'D)

drainage ditches, driveway culverts, signing, striping and utility coordination to relocate a 4-inch CCWD waterline and AT&T joint poles, and temporary removal of a call box in the Clayton area (the “Project”).

Parsons was selected to provide construction management services for the project after completing a request for qualifications solicitation, technical proposal, and interview process. Public Works has successfully negotiated with Parsons to provide the construction management services.

CONSEQUENCE OF NEGATIVE ACTION:

Without Board of Supervisors’ approval, this CSA will not be in effect. A delay in the construction of the Marsh Creek Road Safety Improvements will occur, ultimately delaying the completion of the project. Project delay may also result in substantial additional project costs and jeopardize the funding.
