BACKGROUND: (CONT'D)

it is discharged into a receiving water body. The project will divert storm water from the existing North Richmond Pump Station to a West County Wastewater District sewer main on Gertrude Avenue. The diversion will be conducted on a temporary basis. Inside the existing pump station, two new pumps were installed into the wet well, in addition to new circuit breakers, control panels, and new level and float sensors. Installation of the new pumps will also help the pump station with temporary dry weather flows.

On March 10, 2015, the County entered into a construction contract with Valentine Corporation for the subject project. The above contract has been completed in accordance with the approved plans and specifications. It is recommended that the work covered by the contract be accepted by adopting a Resolution of Acceptance and Notice of Completion (Resolution No. 2016/501).

CONSEQUENCE OF NEGATIVE ACTION:

Accepting a contract as complete is standard procedure and allows for proper closeout of the contract. If the above contract is not accepted as complete, the period for filing stop payment notices and bond claims may be extended.
