

**Contra
Costa
County**

To: Board of Supervisors

From: Brian M. Balbas, Interim Public Works Director/Chief Engineer

Date: January 9, 2018

Subject: Approve a Contract Amendment with PSOMAS for GIS Technical Support Services for a Countywide Stormwater GIS Pilot Project.

RECOMMENDATION(S):

APPROVE and AUTHORIZE the Chief Engineer, Flood Control and Water Conservation District, or designee, to execute, on behalf of the Contra Costa Clean Water Program, a contract amendment with PSOMAS, to increase the payment limit by \$50,000, to a new payment limit of \$365,201, effective December 31, 2017, and to extend the contract termination date from December 31, 2017 to July 1, 2018, for a GIS pilot project necessary to comply with federal and state stormwater rules contained in National Pollutant Discharge Elimination System Permits issued by the San Francisco Bay and Central Valley Regional Water Quality Control Boards, Countywide. Project No. 7519-6x7665

FISCAL IMPACT:

100% funded by Stormwater Utility Fee Assessments collected by the Cities/Towns and County, proportional to their respective populations.

BACKGROUND:

The Contra Costa Clean Water Program (the “CCCWP”) consists of Contra Costa County, its 19 incorporated cities/towns,

BACKGROUND: (CONT'D)

and the Contra Costa County Flood Control and Water Conservation District (hereinafter referred to collectively as “Permittees”). The CCCWP was established in 1991 through a Program Agreement in response to the 1987 amendments to the federal Clean Water Act (the “CWA”), which established a framework for regulating municipal stormwater discharges under the National Pollutant Discharge Elimination System (“NPDES”) Permit Program. The United States Environmental Protection Agency (the “USEPA”) published final rules implementing the 1987 CWA amendments in November 1990. The rules mandate that Permittees obtain and implement stormwater permits designed to reduce and eliminate the discharge of pollutants into and from Municipal Separate Storm Sewer Systems (the “MS4s”) they own and operate. Through the CCCWP, Permittees conduct many of the mandated activities collectively (referred to as “Group Activities”), such as water quality monitoring, special studies, and public education. The roles and responsibilities of the CCCWP and Permittees are outlined in the Program Agreement, which was last updated and adopted by all Permittees in June 2010.

In July 2015, PSOMAS was contracted to develop a CCCWP/countywide stormwater Geographic Information System (GIS) pilot platform for maintaining, analyzing, displaying and reporting required stormwater program data and information (i.e., trash management areas, load reduction activities, and hot spots; C.3 facility locations and inspections; business and construction site inspections and enforcement actions; illegal dumping incidents and follow up, etc.) to comply with NPDES permit requirements. Additional technical services are necessary to complete this platform and to meet the new regulatory mandates adopted in November 2015.

In order to help continue to maintain permit compliance, CCCWP staff, on behalf of the Permittees, respectfully requests approval of this contract amendment with Psomas through July 1, 2018.

CONSEQUENCE OF NEGATIVE ACTION:

If the contract amendment with PSOMAS is not approved, the CCCWP would not be able to fulfill the permit mandates, and municipalities could be found in non-compliance with the NPDES permits issued by the Water Boards. Fines totaling \$10,000 per day and \$10 per gallon of stormwater discharge could potentially be imposed.
