Estimated Project cost: \$660,000. (60% Federal Damage Assessment Funds and 40% Local Road Funds)

### BACKGROUND:

The purpose of this Project is to repair a 72-inch culvert and sinkhole beneath Pinehurst Road that was heavily damaged during the 2017 rainy season. The Project will return the road to satisfactory condition and ensure that storm drainage is conveyed through the culvert. Work will be done during the summer season when the creek is dry or has minimal flow. Construction will take approximately 25 working days. Temporary road closure may be necessary for approximately two weeks; however, advance notification would be provided to surrounding residents identifying potential detours. Emergency vehicles will have access at all times.

### CONSEQUENCE OF NEGATIVE ACTION:

Delay in approving the project may result in a delay of design, construction, and may jeopardize funding.
