Public Health Laboratory. Routine high-volume sexually transmitted infection (STI) testing is performed on Hologic instrumentation on a daily basis.

BACKGROUND: (CONT'D)

During the COVID-19 pandemic, diagnostic testing demand has fluctuated for all laboratory assays. As the pandemic response recedes and the community returns to regular pre-pandemic activities, testing demand has increased and additional funds are needed. Additionally, as new tests have been offered on the current platforms and providers become more familiar with the available test menu, testing demand from the Hologic platform will also increase.

On January 7, 2020, the Board of Supervisors approved agenda item C.36 to execute a purchase order with Hologic, Inc. in the amount of \$1,000,000 to purchase testing reagents and related laboratory supplies for the period of January 1, 2020 through December 31, 2022.

On July 12, 2022, the Board of Supervisors approved agenda item C.115 to execute an amendment to purchase order (#18098) with Hologic, Inc., to extend the term through January 16, 2024 with no change to the payment limit of \$1,000,000 to procure laboratory testing supplies.

Approval of this amendment will allow this vendor to provide additional testing reagents, kits and related laboratory supplies to meet the laboratory's demand through January 16, 2024.

CONSEQUENCE OF NEGATIVE ACTION:

If the purchase order amendment is not approved, the Contra Costa Public Health Laboratory will be unable to purchase the additional testing reagents, kits and related laboratory supplies to incorporate additional STI screening and viral load testing when necessary, as per CDC recommendations.
